

Subject card

Subject name and code	Biotribology, PG_00065017								
Field of study	Mechanical and Medical Engineering								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			2.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Zakład Konstrukcji Maszyn i Inzynierii Medycznej -> Institute of Mechanics and Machine Design -> Faculty of Mechanical Engineering and Ship Technology								
Name and surname			dr inż. Katarzyna Zasińska						
of lecturer (lecturers)	Teachers			1	-				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM	
	Number of study hours	15.0	0.0	15.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	, I		6.0		14.0		50	
Subject objectives	Introduction to tribology. Basic facts and problems related to the phenomenon of friction in its various forms. Fundamental techniques used in research on friction and wear. Significance of friction in technology - positive and negative role cases. Basic tribology of living organisms, in particular the vertabrae family. Biological structures with friction and wear. Types and specifics of friction and wear in living organisms. Wear in biological tribological systems/contacts. Tribological processes related diseases and their treatment. Atificial tribological systems applied in living organisms.								
Learning outcomes	earning outcomes Course outcome Subject outcome					Method of verification			
	[K7_W03] has structi founded knowledge of issues in the field of engineering allowing medical devices, reh systems and to form procedures	methods of treatment of tribo - related diseases in humans.			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge				
	[K7_W12] identifies a the main development and significant new a in the field of engined technical sciences are relevant to the course	tribological processes in living organisms and similarities/ dissimilarities to the tribology of			[SW3] Assessment of knowledge contained in written work and projects [SW1] Assessment of factual knowledge				
[K7_U13] evaluates the feasibility and potential for utilizing new technical and technological achievements in accomplishing tasks characteristic for the field of study			biotribological processes on the			[SU3] Assessment of ability to use knowledge gained from the subject
