| Subject objectives | The aim of the subject "City Logistics" is to provide students with theoretical and practical knowledge on logistics processes in the urban environment, with particular emphasis on managing cargo flows. Students will learn methods of optimizing the transport of goods in cities, tools and technologies supporting logistics management in urban areas, and will understand the challenges related to urbanization and the growing demand for supplies. | | | | | | | |

|----------------------------------|---|--|---|--|--|--|--|
| | [K7_U05] cooperates with other people in the implementation of team work, both as a leader and a team member, effectively achieving set goals | The student is able to cooperate in a team while carrying out tasks in the field of urban logistics, assuming various roles in it. | [SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information | | | | |
| | [K7_K01] recognizes the importance of knowledge related to the field of study in solving cognitive and practical problems | The student is able to identify and solve problems in the field of urban logistics based on the acquired knowledge | [SK2] Assessment of progress of work [SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice | | | | |
| | [K7_W01] identifies in an in-depth way phenomena related to the field of study as well as theories describing them and possible methods of analyzing processes occurring in the life cycle of technical systems | The student is able to use theoretical and practical knowledge to describe and analyze phenomena in the field of urban logistics. | [SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation | | | | |
| | [K7_U02] presents logical and solid arguments regarding the obtained results, through analysis, synthesis of information in various technical contexts, critically approaching their interpretation | The student critically analyzes the discussed phenomena and processes in the field of urban logistics. | [SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU5] Assessment of ability to present the results of task | | | | |
| | [K7_K02] makes competent and ethical decisions, caring for the public interest and maintaining economic, social and environmental values | The student actively participates in team work and takes responsibility for the tasks assigned to him. | [SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work [SK1] Assessment of group work skills | | | | |
| Subject contents | The city as an economic category and logistics entity. The city's logistics system and processes affecting its functioning. Definitions of urban logistics. Functional and spatial division of urban logistics. Problems of cargo transport in cities. Planning of urban cargo transport policy. Tools for managing cargo transport. Fundamentals of urban logistics modeling. Solutions improving cargo flows. Logistics centers in cities. Consolidation of supplies. Sustainable future of transport. Sustainable urban logistics plans (SULP) and Sustainable urban mobility plans (SUMP) - guidelines, principles of implementation. Examples of good practices. | | | | | | |
| Prerequisites and co-requisites | | | | | | | |
| Assessment methods | Subject passing criteria | Passing threshold | Percentage of the final grade | | | | |
| and criteria | | 60.0% | 25.0% | | | | |
| | | 60.0% | 25.0% | | | | |
