

Subject card

Subject name and code	, PG_00065284						
Field of study	Transport						
Date of commencement of studies	February 2024		Academic year of realisation of subject		2024/2025		
Education level	second-cycle studies		Subject group				
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Sławomir Grulkowski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		0.0	30
Subject objectives	Obtaining basic information on the technique and organization of railway transport.						
	Transmission of the message on vertical management in rail traffic						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_K01] recognizes the importance of knowledge related to the field of study in solving cognitive and practical problems		Identifies rolling stock and personnel needs. Determines the use of transport potential using scientific methods		[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills		
	[K7_U05] cooperates with other people in the implementation of team work, both as a leader and a team member, effectively achieving set goals		Is able to identify and define the role of transport in a given location and economic situation. Is able to establish a hierarchy of means of transport with the team		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	[K7_K02] makes competent and ethical decisions, caring for the public interest and maintaining economic, social and environmental values		Is able to choose the preferred transport system in a given situation. Is able to calculate the capacity of the means of transport		[SK2] Assessment of progress of work [SK3] Assessment of ability to organize work		
	[K7_U02] presents logical and solid arguments regarding the obtained results, through analysis, synthesis of information in various technical contexts, critically approaching their interpretation		It can analyze data from transport systems in order to integrate them		[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	[K7_W01] identifies in an in-depth way phenomena related to the field of study as well as theories describing them and possible methods of analyzing processes occurring in the life cycle of technical systems		The student is able to determine the capacity of a station and a railway line. He is able to create a timetable.		[SW1] Assessment of factual knowledge		

Subject contents	LECTURE		
	Rules and procedures for running train traffic on the railway network.		
	Timetable preparation procedure		
	Technology of passenger transport		
	Technology of rail freight Interoperability		
	Capacity of lines and railway stations.		
	TUTORIALS		
	Cyclical timetable		
Prerequisites and co-requisites	Circulation and rotation of the composition		
	Calculation of bandwidth		
	Basic information on the subjects Railway Traffic Engineering and Rail Transport Infrastructure		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Tutorials	60.0%	50.0%
	Test	60.0%	50.0%
