GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Statistics II, PG_00021508		
Field of study	Mathematics		
Date of commencement of studies	October 2024	Academic year of realisation of subject	2024/2025
Education level	second-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	5.0
Learning profile	general academic profile	Assessment form	exam
Conducting unit	Department of Nonlinear Analysis and Statistics -> Faculty of Applied Physics and Mathematics		
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. Karol Dziedziul	
	Teachers	dr hab. Karol Dziedziul	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	30.0	0.0	15.0	0.0	15.0	60

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	60	5.0	60.0	125

Subject objectives

The lecture shows the role of the Vapnik Chervonenkis dimension for the correct estimation of regression functions using decision trees, i.e. what makes us have the consistency theorem. Formulas of information criteria are derived: AKAIKE criterion, Fisher criterion. We show the role of the Rao-Cramer inequality in the context of the limits of knowledge, i.e. the role of uncertainty. The laboratory has a completely applied nature. GLM models, regression models using decision trees, neural networks. Random forest concept.

Learning outcomes

Course outcome	Subject outcome	Method of verification

Subject contents

1. Regression estimator, Cantelli Gliwienko's theorems and regression consistency theorems2. Matrix factorization3. Combinatorics according to Vapnik and Czervonenkis. Vapnik Chervonenkis class generation4. Theorem Rao-Blackwell the Hodges-Lehman theorem.5. Kulback Leibler's information, AKAIKE information criteria.6. Cramer Rao's inequality.7. The role of information8. Laboratory - GLM models, regression models using decision trees, neural networks. Random forest concept

Prerequisites and co-requisites

Mathematical Statistics and Statistics with SAS, Probabilistics

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Half the exercises half an oral examination	60.0%	100.0%
