

## Subject card

Subject name and code	Advanced methods of hull design, PG_00065552						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	February 2025		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group		Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Hinz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	18.0	0.0	0.0	27.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		10.0		70.0	125
Subject objectives	Demonstration of modern ship design methods						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_U02] formulates and tests hypotheses concerning problems related to shipborne and offshore systems/processes, as well as simple research problems	The student is able to explore the possibilities of innovative approaches to ship design	[SU2] Assessment of ability to analyse information
	[K7_U04] creatively designs or modifies, either entirely or in part, a shipborne or offshore system or process according to a given specification, considering both technical and non-technical aspects, estimating costs and adopting design techniques representative for the field	Students is capable to apply various design methods to the given task.	[SU1] Assessment of task fulfilment
	[K7_W01] explains and describes, based on general knowledge in the field of scientific disciplines forming the theoretical foundations of Naval Architecture and Ocean Engineering, the construction and principles of operation of marine systems, processes and their components, as well as methods and means of their design and operation	Students will be able to discuss complex design procedures and ship systems.	[SW1] Assessment of factual knowledge
	[K7_U01] applies acquired analytical, simulation, and experimental methods, as well as mathematical models for analysis and evaluation of shipborne and offshore systems and processes	The student is able to use analytical and simulation methods in the ship design process.	[SU4] Assessment of ability to use methods and tools
	[K7_U13] evaluates the feasibility and potential for utilizing new technical and technological achievements in accomplishing tasks characteristic for the field of study	The student is able to adopt various design methods for a given task.	[SU3] Assessment of ability to use knowledge gained from the subject
	[K7_W04] demonstrates knowledge encompassing selected issues in the field of advanced knowledge, particularly in the scope of methods, techniques, tools, and algorithms specific to Naval Architecture and Ocean Engineering	The student has an in-depth knowledge of advanced ship design methods	[SW1] Assessment of factual knowledge
Subject contents	<ul style="list-style-type: none"> <li>• Top-down approach, including similar ships, regressions and previous projects</li> <li>• Bottom-up approach, including Design Building Blocks, Packing approach and system-based approaches</li> <li>• "What-if" scenarios (epoch-era matrix)</li> <li>• Risk Based Ship Design</li> </ul>		
Prerequisites and co-requisites	Presents a well-established knowledge of the fundamentals of ocean engineering with particular emphasis on ship design		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Project	50.0%	100.0%
