| Subject objectives | Preparing the student to perform simple geodetic works in the area of a construction investment. Presentation of measurement methods and geodetic networks. | | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | | |
| | [K6_U04] Reads and prepares construction documentation (including drawings, graphic documentation in the CAD environment), efficiently uses maps as well as architectural, construction and geodetic drawings. | | The student has the ability to read and prepare project documentation. He/she is able to read geodetic mapping studies and prepare geodetic documentation. | | | [SU1] Assessment of task fulfilment | | |
| | [K6_W04] Knows the rules of descriptive geometry and technical drawing for preparing and reading architectural, construction and geodetic drawings; also with the use of CAD | | The student has the ability to read a technical drawing, is able to extract geometric information from the documentation at hand. | | | [SW3] Assessment of knowledge contained in written work and projects | | |
| Subject contents | Methods of densification of geodetic points, stabilization of points, calculating the coordinates of points using the forward notches and the polar method. Hausbrandt symbols. Angle measurement methods. Trigonometric leveling. Tachymetry. Use of Total -Station in geodetic measurements. | | | | | | | |
