

Subject card

Subject name and code	Thesis Seminar , PG_00041398						
Field of study	Civil Engineering						
Date of commencement of studies	February 2025			Academic year of realisation of subject		2025/2026	
Education level	second-cycle studies			Subject group		Optional subject group	
Mode of study	Full-time studies			Mode of delivery		at the university	
Year of study	2			Language of instruction		Polish	
Semester of study	3			ECTS credits		3.0	
Learning profile	general academic profile			Assessment form		assessment	
Conducting unit	Department of Metal Structures -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor			dr hab. inż. Elżbieta Urbańska-Galewska			
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	45.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	<p>Assistance in the implementation of the diploma thesis,</p> <p>Review of current research issues of metal structures related to the implementation of the diploma thesis.</p> <p>Deepening the skills of independent literature search,</p> <p>Development (on the basis of available literature or standards) of selected detailed issues related to the implementation of the diploma thesis, presentation of the paper and subjecting it to public discussion.</p>						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile		The student has extended knowledge in steel structures				
	[K7_K04] understands the necessity of dissemination civil engineering knowledge in the society and to support the professional ethos of a civil engineer		The student has knowledge of importance for society of profession of construction engineer				
	[K7_K02] Recognizes the significance of knowledge in solving cognitive and practical problems; reliably evaluates results of his own and team research		The student is able to present on the subject of literature in the field of metal structures regarding the diploma thesis				
	[K7_W15] has deep and adequate knowledge of civil engineering, within offered specialization and profile		The student is able to formulate and provide feedback on construction of steel structures				
Subject contents	presenting progress in the diploma thesis, discussing computer models of the analyzed structures and analyzing the results obtained, discussion of examination issues during the final exam						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentations	60.0%	100.0%
Recommended reading	Basic literature	Papers from technical journals and conferences.	
	Supplementary literature	papers from the WoS database	
	eResources addresses	Adresy na platformie eNauczenie:	
Example issues/ example questions/ tasks being completed	presentation of the computational model used in the thesis		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
