

Subject card

Subject name and code	Thesis Seminar , PG_00041398								
Field of study	Civil Engineering								
Date of commencement of studies	February 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject gro	Subject group			Optional subject group		
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language	Language of instruction			Polish		
Semester of study	3		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Geotechnics, Geology and Marine Civil Engineering -> Faculty of Civil and Environmental Engineering							vironmental	
Name and surname	Subject supervisor		dr inż. Witold Sterpejkowicz-Wersocki						
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Project	t	Seminar	SUM	
of instruction	Number of study hours	0.0	0.0	0.0	0.0	45.0		45	
	E-learning hours inclu	uded: 0.0		_					
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation i consultation i		Self-st	udy	SUM	
	Number of study hours	45		5.0		25.0		75	
	discussion and the defence of introduced theses together with proposed solutions, transfers elaborated contents, defends and specifies foundations and the methodology of the thesis execution, extends the gained knowledge for topics chosen from the scientific activity of the Department and current design practice and executive projects. After public presentation the chosen work can be shown on the page of seminar.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_K02] Rocognizes the significance of knowledge in solving cognitive and practical problems; reliably evaluates results of his own and team research		Formulates conclusions and describes the results of his own and team work and the results of important reports on seminars.		[SK4] Assessment of communication skills, including language correctness				
	[K7_W15] has deep and adequate knowlege of civil engineering, within offered specialization and profile		Has structured and in-depth knowledge from civil engineering, within the framework of the offered specialties and diploma profiles		[SW2] Assessment of knowledge contained in presentation				
	[K7_U15] has advanced skills in civil engineering within offered specialization/profile		Has advanced skills from civil engineering, within the framework of the offered specialties and diploma profiles		[SU3] Assessment of ability to use knowledge gained from the subject				
Subject contents	 Information on the form and contents of the thesis, the choice of the literature and sources is presented. Presentation of the conducted and current works delivered by guests invited from design offices, contractors and scientific workers. Performance of the chosen current problems of the hydro- and marine civil engineering. Student performs the monographic elaboration on the chosen theme from the range of diploma profiles on the basis of domestic and foreign literature. Student performs the multimedia presentation containing main highlights of the theses and accepted methodology of thesis realization.
