

Subject card

Subject name and code	Transmission of Media and Energy, PG_00049660						
Field of study	Engineering and Technologies of Energy Carriers						
Date of commencement of studies	February 2025	Academic year of realisation of subject			2024/2025		
Education level	second-cycle studies	Subject group			Optional subject group Subject group related to practical vocational preparation		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			2.0		
Learning profile	practical profile	Assessment form			assessment		
Conducting unit	Department of Energy Conversion and Storage -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Anna Kuczyńska-Łażewska				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	The aim of the course is to enable students to acquire knowledge about the types and construction of water supply networks, heat sources and heat transfer to facilities, power distribution networks, types of gas networks and principles of their design and technical requirements related to the design of transmission networks.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_W02	student knows and understands the phenomena occurring in industrial apparatus, has detailed knowledge of energy carriers and the possibilities of its processing			[SW1] Assessment of factual knowledge		
	K7_W05	student knows and understands the processes occurring in devices for energy production and conversion, knows the rules for generating energy from conventional and renewable sources, and the possibilities of their transmission and storage			[SW3] Assessment of knowledge contained in written work and projects		

Subject contents	<p>Water and sewage networks: ·</p> <ul style="list-style-type: none"> Water flow in branched and annular systems of water and sewage networks. Methods of network design, preparation of water balances, presentation of principles for the construction of water supply networks. Location of transmission lines, utilities of water supply networks. The rules for the acceptance of the installation, the basis for the operation of the existing water supply networks. Wastewater transport. Basics of sewerage network design. <p>System heat: ·</p> <ul style="list-style-type: none"> Heat production. Design and operation of the heating network. Calculation of the demand for power of heating networks with high parameters. Thermal centers in district heating systems. Installation and operation of the heating network. <p>Gas networks:</p> <ul style="list-style-type: none"> Types of combustible gases and their properties as well as exhaust properties. Types of gas networks and their equipment. Designing gas networks and installations. <p>Power networks:</p> <ul style="list-style-type: none"> Characteristics of electrical distribution networks. Forecasting of electric power loads of distribution networks. Reliability of supply and quality of electricity. Operation and optimization of distribution networks 											
Prerequisites and co-requisites												
Assessment methods and criteria	<table border="1"> <thead> <tr> <th data-bbox="451 947 794 981">Subject passing criteria</th> <th data-bbox="794 947 1137 981">Passing threshold</th> <th data-bbox="1137 947 1487 981">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 981 794 1014">tests</td> <td data-bbox="794 981 1137 1014">60.0%</td> <td data-bbox="1137 981 1487 1014">50.0%</td> </tr> <tr> <td data-bbox="451 1014 794 1048">project</td> <td data-bbox="794 1014 1137 1048">80.0%</td> <td data-bbox="1137 1014 1487 1048">50.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	tests	60.0%	50.0%	project	80.0%	50.0%
