

Subject card

Subject name and code	Power engineering for automation engineers, PG_00059855						
Field of study	Automation, Robotics and Control Systems						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Electrical Power Engineering -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Robert Kowalak					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	10.0		45.0	100	
Subject objectives	Familiarization with the structure of the power system, its operation, regulatory processes and system data processing. Performing flow and short-circuit calculations. Familiarization with regulatory processes in the power system.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_W11] knows the hazards arising from devices, installations, systems and technical systems, basic principles of occupational health and safety, taking into account the role of control and security systems in controlling automation and robotics facilities	Describes threats in the operation of the power system and methods of limiting and eliminating them. Performs calculations for symmetrical short circuits.			[SW1] Assessment of factual knowledge		
	[K6_U04] has the ability to self-educate, among other things, in order to improve professional qualifications	Performs calculations of current and power flows and voltage levels in the power system.			[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment		
	[K6_K05] can think and act in an entrepreneurial way	Identifies threats to the operation of the power system.			[SK5] Assessment of ability to solve problems that arise in practice		
	[K6_W07] has basic knowledge related to control and automation systems	Describes the principles of power system regulation. Presents basic regulation and protection systems in power devices.			[SW1] Assessment of factual knowledge		
	[K6_W06] knows the structure of computers and microprocessors and the tasks of operating systems, has basic knowledge of the basics of computer software, drivers, microprocessor technology, design of simple algorithms and the operation of information networks	Presents the structures of basic control and protection systems used in the power industry. Describes the structures of data collection, visualization, processing and archiving systems used in the power industry.			[SW1] Assessment of factual knowledge		

Subject contents	<p>LECTURE: Structure of the power system, main devices that are elements of the systems for generating, transmitting and distributing electrical energy. Equivalent diagrams of the elements of the power system. Generation and regulation of active and reactive power in the power system. Power and frequency regulation in the power system - primary and secondary regulation. Voltage regulation in the power system. EAZ systems. Control of the system operation - systems for collecting, visualizing, processing and archiving data.</p> <p>EXERCISES: Equivalent diagrams of transformers and overhead and cable lines. Calculation of current and power flows, power losses, voltage levels in networks supplied from one side and two sides. Calculation of short-circuit currents for symmetrical short-circuits.</p>											
Prerequisites and co-requisites	Electrical engineering											
Assessment methods and criteria	<table border="1" data-bbox="451 465 1487 568"> <thead> <tr> <th data-bbox="451 465 794 499">Subject passing criteria</th> <th data-bbox="794 465 1137 499">Passing threshold</th> <th data-bbox="1137 465 1487 499">Percentage of the final grade</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 499 794 533">Colloquia during the semester</td> <td data-bbox="794 499 1137 533">60.0%</td> <td data-bbox="1137 499 1487 533">40.0%</td> </tr> <tr> <td data-bbox="451 533 794 568">Final pass</td> <td data-bbox="794 533 1137 568">60.0%</td> <td data-bbox="1137 533 1487 568">60.0%</td> </tr> </tbody> </table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Colloquia during the semester	60.0%	40.0%	Final pass	60.0%	60.0%
Subject passing criteria	Passing threshold	Percentage of the final grade										
Colloquia during the semester	60.0%	40.0%										
Final pass	60.0%	60.0%
