Subject objectives	Implementation of the topic of the selected research project whose purpose is to verify the hypothesis or research idea, in the case of an industrial project, process or product innovation.									
Learning outcomes	Course outcome Subject outcome Method of verification									
	and phenomena related to the		The student uses modern and advanced research techniques to accomplish the declared tasks. He/ she is able to identify the appropriate ways to carry out the task and solve the research problem. Appropriately uses his/ her competencies by acting in a way to deepen his/her skills.			[SW2] Assessment of knowledge contained in presentation				
	[K7_U101] is able to formulate complex research problems and adopts appropriate methods, obtaining innovative solutions, cooperating with other people, both as a leader and a team member		activities in the field of teamwork,			[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment				
	[K7_K101] acknowledges the importance of knowledge related to the field of study in solving cognitive and practical problems, critically assessing the information obtained		The student uses own knowledge in a way that allows verification of the thesis, skillfully uses research techniques and presents the results of his work in an understandable way. Analyzes literature data and information obtained from other sources. Works effectively in the implementation of the task.			[SK4] Assessment of communication skills, including language correctness [SK3] Assessment of ability to organize work
