

Subject card

Subject name and code	EXPERT SYSTEMS IN BUSINESS, PG_00066547								
Field of study	Economic Analytics								
Date of commencement of studies	October 2024		Academic year of realisation of subject			2026/	2026/2027		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
						Subject group related to scientific research in the field of study			
Mode of study	Part-time studies (on-line)		Mode of delivery			blended-learning			
Year of study	3		Language of instruction			Polish			
Semester of study	6		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics								
Name and surname	Subject supervisor	dr inż. Anna Trzaskowska							
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	8.0	0.0	16.0	0.0		0.0	24	
	E-learning hours included: 18.0								
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation i consultation h			tudy	SUM	
	Number of study hours			6.0		45.0		75	
Subject objectives	Uses expert systems supporting decision-making processes, designing solutions using inference mechanisms and knowledge bases								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_W02] Demonstrates advanced knowledge of methods and techniques related to the field of study in economic analytics to explain complex problems.		appropriate to support the analysis			[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation			
	[K6_U07] Applies advanced information technologies to enhance data analysis and decision-making processes.		uses IT tools adequate to solve contemporary economic problems, including supporting decision-making processes			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information			
Subject contents	Introducing to expert systems - definition of basic concepts: data, information, knowledge, knowledge formalization; expert systems - classification, applications, construction and examples. Creation of expert systems - reasons, stages of design, types, advantages and disadvantages, acquiring knowledge; structure of the expert system - overview of components (knowledge base, inference machine, explanatory module, user interface). Knowledge representation - knowledge acquisition process, knowledge base, representation methods, knowledge representation languages. Complex methods of knowledge representation - semantic networks, predicates and resolution method, frames, neural networks, fuzzy sets and fuzzy logic, genetic algorithms, evolutionary programming, scenarios, the Delphi method. Information technologies supporting the construction of expert systems programming languages in logic - Prolog. Designing a simple rule-based expert system - market analysis, concept, knowledge base, project schedule, business case.								
Prerequisites and co-requisites									
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade			
	exam in the form of a test		-		20.0%				
	laboratory		60.0%			80.0%
