

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Computers Graphics, PG_00058926								
Field of study	Informatics								
Date of commencement of studies	October 2025		Academic year of realisation of subject			2026/2027			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Part-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department of Intelligent Interactive Systems -> Faculty of Electronics Telecommunications and Informatics - > Wydziały Politechniki Gdańskiej								
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Jacek Lebiedź						
	Teachers		dr inż. Jacek	Lebiedź					
			dr inż. Jerzy Dembski						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	0.0	15.0	0.0		0.0	30	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation ir classes includ plan				Self-study SUM				
	Number of study 30 hours			5.0		65.0		100	
Subject objectives	The purpose of education is to acquire the ability to create images using standard graphics APIs (libraries Allegro, GDI, Xlib, OpenGL i DirectX) and to implement transformation of 2D and 3D images.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_W01] knows and understands, to an advanced extent, mathematics necessary to formulate and solve simple issues related to the field of study		Student uses mathematical models to define the image,			[SW1] Assessment of factual knowledge			
	[K6_U07] can apply methods of process and function support, specific to the field of study		rendering pipeline and is able to modify its steps.			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment			
	[K6_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study and perform tasks, in an innovative way, in not entirely predictable conditions, by:n- appropriate selection of sources and information obtained from them, assessment, critical analysis and synthesis of this information,n- selection and application of appropriate methods and toolsn					[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment			

Prerequisites No requirements   Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade   Practical exercise 60.0% 50.0%   Written exam 53.0% 50.0%   Recommended reading Basic literature 1. Angel E: Interactive Computer Graphics. A Top-Down Approach Using OpenGL (3rd Edition). Addison Wesley 2003. 2. Foley J. D., van Dam A., Feiner S. K., Hughes J. F.: Computer Graphics: Principles and Practice, Ide Edition). Addison-Wesley, Reading 1990. 3. Hill F. S. Jr., Kelley S. M.: Computer Graphics using OpenGL (3rd Edition). Pearson Education 2007. 4. Pharr M., Humphreys G.: Physically Based Rendering, From Theory to Implementation (2rd Edition). Morgan Kaufmann 2010. 5. Schneider Ph. J., Eberly D. H.: Geometric Tools for Computer Graphics. Morgan Kaufmann 2003.   Supplementary literature 1. Shreiner D., Sellers G., Kessenich J., Licea-Kane B.: OpenGL Programming Guide. The Official Guide to Learning OpenGL, Version 4.3 (8th Edition). Addison-Wesley 2013. 2. Varcholik P.: Real-Time 3D Rendering with DirectX and HLSL: A Practical Guide to Graphics Programming (Game Design). Addison-Wesley 2014.   eresources addresses Application for drawing of given solid using a particular graphics API.	Subject contents	1. Rules of credit for a course, bibliography 2. Concept of computer graphics, image processing and pattern recognition 3. Applications of computer graphics, image processing and pattern recognition 4. Basic techniques in computer graphics – image generating with use of standard graphical API 5. Implementation of basic transformations (scaling, rotation, translation) by mechanism of standard graphical API 6. Graphical environments: MS Windows, X Window; graphics systems: standard API, DirecX, OpenGL; graphics engines 7. Visual perception, human eye, receptors: rooks and cones 8. Color – trichromacy theory, metamerism 9. Theoretical and technical color models 10. CIE XYZ color model 11. CIE LUV, CIE LAB, TekHVC color models 12. RGB color model 13. CMY, CMYK color models 14. HSV, HLS color models 15. YUV, YIQ, YCbCr color models 16. Raster graphics – concept, forms of images and representation methods 17. Vector graphics – concept, forms of images and representation methods 18. Comparison of raster and vector graphics, vector graphics emulation for raster graphics devices 19. Digital geometry – concept of pixel, pixel neighborhood 20. Image digitization – sampling, condition of compatibility of region with sampling grid 21. Image digitization – quantization, dithering, error diffusion 22. Lossless image compression: UPCPM, wavelet compression (JPEG2000), discrete cosine transform compression (JPEG), fractal compression 24. Fractals – concept, examples, applications, drawing methods, collage theorem 25. Scan-conversion algorithms for straight line segments: numerical, conditional (Bresenham''s algorithm, midpoint algorithm, structural 26. Aliasing and antialiasing – scan-conversion algorithms for antialiased straight line segments: Gupta-Sproull algorithm, Wu's algorithm 27. Scan-conversion algorithms for Bézier curves – definition and features, de Casteljau's algorithm for point of B-splines – definition and features, de Boor-Cox algorithm for point of B-splines 30. Scan-conversion algorithms for Bézier curves						
Assessment methods and criteria   Subject passing criteria   Passing threshold   Percentage of the final grade     Practical exercise   60.0%   50.0%     Written exam   53.0%   50.0%     Recommended reading   Basic literature   1.
