GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Portable devices technologies, PG_00047764
Field of study	Informatics

Date of commencement of studies	October 2025	Academic year of realisation of subject	2026/2027
Education level	second-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Part-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	4.0
Learning profile	general academic profile	Assessment form	exam

Conducting unit	Department of Geoinformatics -> Faculty of Electronics Telecommunications and Informatics -> Wydziały Politechniki Gdańskiej
Name and surname of lecturer (lecturers)	**Subject supervisor** mgr inż. Tomasz Idzi
	Teachers mgr inż. Tomasz Idzi dr inż. Marek Kulawiak mgr inż. Łukasz Markiewicz

Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	12.0	0.0	15.0	0.0	0.0	27
	E-learning hours included: 0.0						

Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
	Number of study hours	27	10.0	63.0	100

Subject objectives	The goal of the subject is to educate the students on technologies applicable to mobile devices.

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_U08] while identifying and formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work	Student is able to design modern mobile applications and apply appropriate design patterns.	[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools
	[K7_W03] knows and understands, to an increased extent, the construction and operating principles of components and systems related to the field of study, including theories, methods and complex relationships between them and selected specific issues - appropriate for the curriculum	Student knows the architecture of mobile systems and is able to present the relationship between their layers.	[SW1] Assessment of factual knowledge
	[K7_U09] can carry out a critical analysis of the functioning of existing technical solutions and assess these solutions, as well as apply experience related to the maintenance of advanced technical systems, devices and facilities typical for the field of studies, gained in the professional engineering environment	Student knows the characteristics of libraries available in the iOS system and is able to choose the right tools to solve a specific problem.	[SU1] Assessment of task fulfilment

Subject contents	Mobile devices market.
	Mobile operating systems.
	Selling mobile applications.
	Hardware in mobile devices.
	GPS system.
	Mobile sensors.
	Objective-C programming language.
	Cocoa Touch framework
Prerequisites and co-requisites	Programming experience.

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	50.0%	50.0%
	Laboratory	50.0%	50.0%

Recommended reading	Basic literature	Scott Stevenson: Cocoa and Objective-C: Up and Running, O'Reilly 2010
	Supplementary literature	N/A
	eResources addresses	

Example issues/ example questions/ tasks being completed	N/A
Work placement	Not applicable

Document generated electronically. Does not require a seal or signature.
