

Subject card

Subject name and code	Virtual Reality, PG_00063900							
Field of study	Informatics							
Date of commencement of studies	February 2026		Academic year of realisation of subject			2026/2027		
Education level	second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	2		ECTS credits			4.0		
Learning profile	general academic profile		Assessment form			exam		
Conducting unit	Department Of Intelligent Interactive Systems -> Faculty Of Electronics Telecommunications And Informati> Wydziały Politechniki Gdańskiej					And Informatics		
Name and surname	Subject supervisor		dr inż. Jacek Lebiedź					
of lecturer (lecturers)	Teachers		dr inż. Jacek Lebiedź					
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	:t	Seminar	SUM
of instruction	Number of study hours	15.0	0.0	30.0	15.0		0.0	60
	E-learning hours inclu	uded: 0.0				,		
Learning activity and number of study hours	Learning activity	Participation in classes including plan		· ·		Self-study SUM		
	Number of study hours	60		8.0		32.0		100
Subject objectives	The purpose of educa	ation is to acqu	ire the skills to	design and im	plement	ation of	virtual reality	systems.
Learning outcomes	Course outcome		Subject outcome		Method of verification			
	[K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment		Student is able to design and implement software to support a selected virtual reality device (eg VR goggles)			[SU1] Assessment of task fulfilment		
			Student manages multimedia data, selects the model visualized object and image generation method, uses specialized libraries for data processing and visualization			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
[K7_W10] knows and understands, to an increased extent, the basic processes occurring in the life cycle of equipment, objects and technical systems, as well as methods of supporting processes and functions, specific to the field of study		The student knows and understands the rapid processes of moral obsolescence of virtual reality equipment.			[SW1] Assessment of factual knowledge

w V V S S O O A A O O O O O O O O O O O O O O	leality 3. Three I's – features of VR: interaction, immersion, imagination 4. History of early VR – devices with utility 3. Three I's – HMDs, Virtual cockpit, VIVED, Aspen Movie Map 6. Early gloves and haptic displays 7. Other historical VR devices: Videoplace, LEEP Optical System, BOOM 8. Cave Automatic Virtual Environment (CAVE), PDC Cube 9. State of the art of VR devices, future of VR devices 10. VR system architecture – VR engine and input/output devices 11. Interaction – input devices of VR, tracking of six degrees of freedom (x, y, z, yaw, pitch, and roll), tracking performance parameters 12. Trackers: mechanical, magnetic, ultrasonic 13. Trackers: optical, hybrid inertial 14. Navigation/manipulation interface: tracker based interface, trackballs, 3D probes 15. Gesture interface – sensing gloves, sensor types: electrical, fiber-optic, capacitive, strain gauge 16. Immersion – output devices of VR, human visual system, human auditory system, human haptic system 17. Personal graphics displays: head-mounted displays, face-mounted displays, and-supported displays, 18. Monitor-based large-volume displays, projector-based displays, workbench displays 19. Sound displays, 3D virtual sound, head-related transfer function HRTE 20. Haptic feedback, tactile feedback interfaces: force feedback gloves, temperature feedback gloves 21. Force feedback interfaces: force feedback joysticks, haptic arms, force feedback gloves 22. Virtual studio – bluescreene (blue box) technique, chroma and distance keying 23. Generating shadows of the virtual objects on the real scene, generating shadows of the virtual objects on the real scene, generating shadows of the real objects on the virtual scene 24. Other special effects used in the film, television, and entertainment industry 25. Physical interactive simulation – simulators of vehicles: flight simulators, marine simulators, train simulators; other simulators 28. History of simulation of simplified equations of ship motion – conclusions 30. Real physical model for ship motion – equa
