

Subject card

Subject name and code	Advanced Engineering Management, PG_00066995								
Field of study	Smart Renewable Energy Engineering								
Date of commencement of	October 2025	_			2025/2020				
studies	October 2025		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Optional subject group Humanistic-social subject group			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			English			
Semester of study	2		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Informatics In Management -> Faculty of Management and Economics -> Wydziały Politechniki Gdańskiej						iały		
Name and surname	Subject supervisor		dr inż. Sławomir Ostrowski						
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	ct Seminar		SUM	
of instruction	Number of study hours	15.0	0.0	30.0	0.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation ir classes includ				Self-study SUM				
	Number of study hours	45		5.0		25.0		75	
Subject objectives	Familiarization with project management methods and practicing them on the example of an implemented project.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_K04] understands the principles of sustainable development and can apply them to energy projects, taking into account environmental, economic, and social considerations		The student understands the principles of sustainable development and knows the methods of their practical application in energy projects, with particular emphasis on ecological, economic and social aspects.			[SK1] Assessment of group work skills			
	[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applications		has general knowledge in the field of humanities, social sciences, economics or law, including their foundations and applications			[SW1] Assessment of factual knowledge			
	and coordinate activities in energy- related projects		Students can collaborate effectively in multidisciplinary teams implementing energy projects. They demonstrate the ability to communicate effectively, coordinate activities, and integrate the knowledge and competencies of various specialists to achieve the intended project outcomes.			[SU1] Assessment of task fulfilment			
	[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems		can apply knowledge of the humanities or social sciences or economics or law to solve problems			[SU4] Assessment of ability to use methods and tools

Body of Knowledge, (PMBOK® Guide) Redlarski, Krzysztof. Podstawy metodyki zarządzania projektami w ujęciu klasycznym. Wydawnictwo Politechniki Gdańskiej, 2016 Trocki M.: Zarządzanie projektami, PWN Warszawa 2003r Wilczewski S.: MS Project 2010 i MS Project Server 2010. Helion 2011 Supplementary literature Pritchard Carl L., Zarządzanie ryzykiem w projektach, WIG - PRESS Warszawa 2002 Kerzner H.: Project Management a Systems Approach, To Pleanning, Scheduling and Controlling Chatfield C., Johnson T., MicrosoftOffice Project 2010 krok po kroku, RM Warszawa 2011 eResources addresses Example issues/	Subject contents	LECTURE:						
Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade	Subject contents	Classical, agile, and adaptive project management methodologies. Which are best for engineering projects related to wind energy? Principles of project planning. Project management areas and processes. Project integration management. Scope management in engineering projects. Division of responsibilities in investment projects. Collaboration with the client. Principles of investment project preparation and implementation. Specifics of project management in wind energy. Human resources management in the project. Supplier portfolio management in the project. Project cost management. Project cost and duration analysis methods. Project cost and duration analysis methods. Project communication management. Methods of communication with stakeholders and relationship management (developer/operator). Methods of negotiation with subcontractors and assertiveness towards subordinates. Risk management in energy projects. Procurement management in energy projects. Project portfolio management. Principles and best practices used in energy projects. Project portfolio management. Principles and best practices used in energy projects. LABORATORY: Using MS Project to implement your own project (engineering/investment). Designing an activity network from a task list, including parent and subordinate tasks. Assigning resources to tasks using fixed work, fixed time, and fixed resource count methods. Balancing resources and eliminating overloads. Overtime as an emergency resource. Shared resource pool. Managing multiple projects (developer/operator communication). Project cost analysis. Project deadline risk analysis. Reporting (printouts).
