		E-learning hours included: 0.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
		Number of study hours	24	3.0		48.0	75	
Subject objectives		<p>This course is based on the idea that achieving sustainable well-being requires a holistic approach, aligning personal, professional, and planetary welfare. It aims to foster wellness across these three dimensions by empowering individuals with the necessary knowledge and skills to enact meaningful action.</p> <p>Students will examine strategies for achieving well-being in three dimensions: personal, professional and planetary not only for the benefit of their own, but also for the broader community and environment. Through a combination of theoretical frameworks and practical applications, the course aims to promote holistic well-being that integrates the three dimensions.</p>						
Learning outcomes		Course outcome	Subject outcome		Method of verification			
		[K7_W01] Understands economic issues and selects methods to explain them, considering mutual interactions and utilizing in-depth general and specialized knowledge related to the field of economic analytics	<p>Identifies and analyzes key phenomena related to a holistic approach to well-being on personal, professional, and planetary levels.</p> <p>Recognizes and explains theories describing strategies for achieving sustainable well-being, taking into account an interdisciplinary approach that includes psychology, ecology, and management.</p>		<p>[SW3] Assessment of knowledge contained in written work and projects [SW2] Assessment of knowledge contained in presentation</p>			
		[K7_U02] Presents logical and well-founded arguments regarding obtained results through the analysis and synthesis of information in various business contexts, critically evaluating their interpretation	<p>Selects and applies appropriate analytical methods to assess the effectiveness of strategies promoting well-being in individual, organizational, and environmental contexts.</p> <p>Critically evaluates contemporary challenges related to well-being and proposes evidence-based solutions that support balance between personal, professional, and planetary aspects.</p>		<p>[SU5] Assessment of ability to present the results of task [SU3] Assessment of ability to use knowledge gained from the subject</p>			

Subject contents	<p>Module 1: Personal well-being</p> <ol style="list-style-type: none"> 1. Introduction to mindfulness, resilience, and mental health. 2. Strategies for maintaining physical health. 3. Role of personal values and goals in achieving well-being. <p>Module 2: Professional well-being</p> <ol style="list-style-type: none"> 1. Dynamic changes in working life and connection between resilience and professional wellbeing. 2. JD-R model and Job Crafting 3. Work-life balance and stress management. 4. Building culture supporting employee well-being. <p>Module 3: Planetary well-being</p> <ol style="list-style-type: none"> 1. Global challenges and strategies; absolute sustainability and planetary boundaries concept definition 2. Systematic view on planetary health 3. Sustainable consumption and production: from global to individual level 4. Environmental impact, economic/social cost of consumption <p>Module 4: Integration and Application</p> <ol style="list-style-type: none"> 1. Developing personal and professional well-being plans. 2. Implementing sustainable practices in daily life and career paths. 3. Case studies and group projects on creating a positive social and environmental impact.
