

Subject card

Subject name and code	QUANTITATIVE METHODS IN THE INTERNATIONAL ECONOMY, PG_00067172						
Field of study	Economics						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Statistics and Econometrics -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr Aleksandra Kordalska					
	Teachers	dr Aleksandra Kordalska dr hab. inż. Aleksandra Parteka					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	30	5.0	15.0	50		
Subject objectives	Describes the possibilities of quantitative methods application in terms of their selection and collecting reliable data						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U06] acquires new knowledge by planning lifelong learning strategies.		acquires new knowledge necessary to conduct analyses in international economics		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_K03] exhibits critical and analytical thinking skills and integrates knowledge from multiple disciplines while acting in an entrepreneurial manner.		shows a critical approach to reliable data sources selection necessary to conduct analyses in international economics		[SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	<p>Introduction to the course, quantitative versus qualitative approach to analyses in the field of international economics, examples of applications and the problem of choosing a research method</p> <p>Introduction to the software - the use of selected modules of the STATA package (and / or R packages) with examples of applications in international economics</p> <p>Macroeconomic, sectoral, and microeconomic sources of data for international analyses and examples of their use</p> <p>Merging economic data that come from different sources</p> <p>Value added in exports - methods of gross exports decomposition</p> <p>Functional specialisation in international trade - a way of identification</p> <p>Creating a database with two-level (country-year) and multi-level (e.g. country-section-year) identification</p> <p>Calculation of macroeconomic and sectoral indicators</p> <p>Methods of an initial analysis of the created databases (descriptive statistics, graphical methods of presenting multidimensional data, outliers)</p> <p>Preliminary examination of the relationship between data, selection of variables for analysis: exo- and endogenous variables - illustration on the example of determinants of economic growth</p> <p>One- and multi-dimensional analyses on the example of the absolute and conditional convergence model</p> <p>Bilateral data and gravity model for international trade</p> <p>Preparing of the project</p>						
Prerequisites and co-requisites	macroeconomics, microeconomics, statistics, econometrics						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	project		60.0%		100.0%
