GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Construction project I, PG_00061511		
Field of study	Architecture		
Date of commencement of studies	October 2025	Academic year of realisation of subject	2026/2027
Education level	first-cycle studies	Subject group	Optional subject group Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	2	Language of instruction	Polish
Semester of study	3	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Department of Technical Fundamentals of Architectural Design -> Faculty of Architecture		
Name and surname of lecturer (lecturers)	Subject supervisor	mgr inż. Tomasz Zybała	
	Teachers		

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	0.0	0.0	0.0	30.0	0.0	30

E-learning hours included: 0.0

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	4.0	16.0	50

Subject objectives

Development of a construction concept for a residential building in accordance with the selected design assumption

Learning outcomes

Course outcome	Subject outcome	Method of verification
[K6_U02] is able to design an architectural object or a simple urban complex that meets the aesthetic and technical requirements	is able to prepare architectural and construction documentation in appropriate scales in relation to the conceptual architectural design; is able to create and modify system solutions for single-family housing	[SU1] Assessment of task fulfilment
[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context	is able to integrate information obtained from various sources, interpret and critically analyze it; is able to use knowledge of technical issues related to the design and implementation of architectural objects; is able to create and interpret structural elements of single-family buildings and their architectural details	[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject

Subject contents

Exercises on general construction principles for single-family houses: Storey detailground floor with floor on the ground according to individual assumptions; detail of the basement floor according toindividual assumptions; general construction assumptions for single-family houses; roof detail orflat roof according to individual assumptions.Study for the facility designed as part of Architectural Design III, including: Structurefacility: static diagram of the building, detailed construction solutions. Technologies, detailarchitectural, detailed solutions. Graphic design and project submission.

Prerequisites and co-requisites

knowledge of general building technology I & II and building materials
