

Subject card

Subject name and code	General building technology III, PG_00061521						
Field of study	Architecture						
Date of commencement of studies	October 2025	Academic year of realisation of subject			2026/2027		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	3	ECTS credits			1.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Technical Fundamentals of Architectural Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Tomasz Zybala				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	0.0	0.0	15
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	15		2.0		8.0	25
Subject objectives	Learning how to use basic construction solutions in residential buildings.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		is able to develop solutions for individual building systems and elements in terms of technology, construction and materials; including architectural and construction details in traditional construction; is able to indicate advantages and disadvantages given solution		[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment		
[K6_W01] knows and understands construction problems, building and engineering issues related to building design; principles, solutions, constructions and building materials used in simple engineering tasks in the field of architectural and urban design		knows and understands the issues of construction, technology and building structures, including key issues in architectural design, is able to use knowledge acquired during studies		[SW3] Assessment of knowledge contained in written work and projects			
Subject contents	Wall construction elements, lintels, parapets, wreaths, plinths; Ceiling structures; Structures and details flat roofs; Structures and coverings of steep roofs; Waterproofing of basement walls						
Prerequisites and co-requisites	Knowledge of general construction I and building materials						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	written assessment		51.0%		100.0%
