Subject objectives	The program aims to build students' knowledge about the possibilities of using computer programs to create design documentation and graphical presentations and develop basic skills in this area.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U03] is able to prepare a graphic, written and oral presentation of your own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design		The student uses graphic computer programs to create models and planar representations of three-dimensional objects in order to present the results of the design process.		[SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task		
	[K6_U01] is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context		Has practical skills in creating and editing vector graphics and raster images. Can select appropriate computer tools and graphic resources for a design task.		[SU4] Assessment of ability to use methods and tools
