

Subject card

Subject name and code	BIG DATA, PG_00067547						
Field of study	Economic Analytics						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	second-cycle studies		Subject group		Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department Of Statistics And Econometrics -> Faculty Of Management And Economics -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	45.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		5.0		35.0	100
Subject objectives	Demonstrates in-depth comprehensive preparation for the analysis of large data sets						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U01] creates innovative solutions for complex and unstructured processes, considering unpredictable environmental conditions through the synthesis of information from various sources.		is capable of formulating innovative solutions to complex problems based on the analysis of large and unstructured datasets, integrating information from various sources and applying advanced machine learning algorithms under conditions of uncertainty.		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_W06] knows and understands the principles of evaluating the reliability of utilized data, applying in-depth specialized knowledge in the field of economic analysis.		knows advanced technologies for processing large datasets, assessing their credibility and quality based on in-depth knowledge of economic analytics, in order to prepare data for solving complex decision-making problems.		[SW1] Assessment of factual knowledge		
Subject contents	Overview of Big Data. Types of Digital Data, Introduction to Big Data Big data programming tools (e.g., Hadoop, MongoDB, Spark, etc.). Using Spark with R Big data extraction and integration Big data storage; Technologies for Handling Big Data Introduction to Hadoop HDFS (Hadoop Distributed File System) Dig Deep to understand the fundamental of MapReduce and HBase Hadoop MapReduce in R; Integrating Hadoop and R RHIFE; RHadoop Data Analytics with R and Hadoop data preprocessing, visualising data Big Data Analysis and Machine Learning supervised and unsupervised ML algorithms. Spark Machine Learning with R Importing and exporting data from various DBs (RMySQL, RSQLite, RHive, RHBase). Using SparkSQL with R Big Data Analytics with BigR Deep learning algorithms with R & H2O						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	60.0%	40.0%
	Exam	60.0%	60.0%
