

Subject card

Subject name and code	FINANCIAL ENGINEERING, PG_00067688						
Field of study	Management, Management						
Date of commencement of studies	February 2026		Academic year of realisation of subject		2026/2027		
Education level	second-cycle studies		Subject group		Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Finance -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	30.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		25.0	75
Subject objectives	Values derivatives using them to reduce financial risk						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W04] has an in-depth understanding of analytical methods, reliable data sources, and copyright principles in the context of solving contemporary management problems.		knows financial engineering methods and uses reliable sources in analytical work		[SW1] Assessment of factual knowledge		
	[K7_K02] acts entrepreneurially, making competent and ethical decisions that consider the public interest as well as economic, social, and environmental values.		uses analytical results to make ethical decisions that support the creation of economic, social, and environmental value		[SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	The essence and application of financial engineering Derivatives and their classification Valuation of forward contracts for assets Currency forwards/futures Commodity forwards/futures Valuation of FRA contracts Valuation and construction of currency swap contracts Valuation and construction of interest rate swap contracts Option pricing using the binomial model The Black-Scholes model in option pricing Greek coefficients Option strategies and examples of their use Exotic derivatives and their use Strategies for investing in derivatives Efficiency of hedging strategies						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	2 tests per semester		60.0%		50.0%		
	Exam		60.0%		50.0%
