

## Subject card

Subject name and code	BUSINESS PROCESSES MODELING, PG_00067731						
Field of study	Management						
Date of commencement of studies	February 2026		Academic year of realisation of subject		2025/2026		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies (on-line)		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department Of Management -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	16.0	0.0	0.0	16
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	16		3.0		31.0	50
Subject objectives	Uses simulation methods to map the operation of the real process, critically interpreting the results obtained before using them in the decision-making process						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U02] presents logical and well-founded arguments regarding obtained results through the analysis and synthesis of information in various business contexts, critically evaluating their interpretation.		can analyze and model business processes, formulate logical conclusions, and present results in a well-reasoned and critical manner, appropriate to the business context		[SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment		
	[K7_W02] understands the significance and interrelationships of key components describing economic processes, drawing on in-depth knowledge aligned with major developmental trends in scientific disciplines related to the field of studies.		has in-depth knowledge of the structure and interrelations of business processes, in line with current trends in management and economic sciences		[SW1] Assessment of factual knowledge		
Subject contents	Basic concepts and definitions, familiarization with the iGrafx Process tool, creating a process map, basic symbols (events, activities, gates) Simulation elements: schedules, generators, resources, tasks, attributes, functions, decision gates, freeze frames, charts, scenarios, reports Simulation environment settings, scenarios Implementation of the content of tasks in accordance with the set parameters, simulation, analysis of results, process optimization Final task						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Laboratory tasks		60.0%		100.0%		
Recommended reading	Basic literature		Dokumentacja programu iGrafx Process, dostępna w Internecie
