

## Subject card

Subject name and code	Risk and Security Management in the Enterprise, PG_00067753						
Field of study	Management, Management						
Date of commencement of studies	October 2026		Academic year of realisation of subject		2026/2027		
Education level	second-cycle studies		Subject group		Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies (on-line)		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Management Engineering And Quality -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskieį						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	16.0	0.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		3.0		48.0	75
Subject objectives	Creates innovative solutions to complex security problems using appropriate assessment and design methods						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U01] creates innovative solutions for complex and unstructured processes, considering unpredictable environmental conditions through the synthesis of information from various sources.		can design non-standard solutions in risk and security management by synthesizing information from various sources and adapting them to dynamic environmental conditions		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	[K7_W04] has an in-depth understanding of analytical methods, reliable data sources, and copyright principles in the context of solving contemporary management problems.		has in-depth knowledge of risk and security analysis methods in enterprises		[SW1] Assessment of factual knowledge		
Subject contents	Organizational and economic aspects of security management in an enterprise. Quality management and safety management in a modern enterprise. Responsibilities of the employer in terms of safety management Regulations on security management in the enterprise. Threat identification techniques. Functional and process safety Work safety management. Identification of occupational hazards Accidents in the work process and their analysis. Quantitative threat assessment techniques. Threat analysis using FTA techniques. Methods of occupational risk assessment. Principles of documenting the results of occupational risk assessment. Technical, organizational and cultural risk reduction measures Legal basis of the OHS management system. The concept and elements of the security system. Occupational health and safety process management. Preparation of system procedures. Cost estimate for the implementation of the OHS management system. Certification of the health and safety management system Safety in the operation of machines and devices. Organization of maintenance services. Training and motivating employees to behave safely Security and protection of the company's material resources. Physical protection. Electronic devices and monitoring systems in the enterprise Information security management. Enterprise IT policy and security management. Video monitoring systems and monitoring of user activity in computer networks Economic aspects of the selection of technical and organizational security measures ensuring business continuity						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	60.0%	50.0%
	Practical exercises	60.0%	50.0%
Recommended reading	Basic literature	Podgórski D., Pawłowska Z.: Podstawy systemowego zarządzania bezpieczeństwem i higieną pracy CIOP Warszawa 2004 Wołowski F., Zawila-Niedźwiecki J.: Bezpieczeństwo systemów informatycznych. Wyd. Edu-Libri 2013
