

Subject card

Subject name and code	Enterprise Information Systems, PG_00067785								
Field of study	Economic Analytics								
Date of commencement of studies	October 2025		Academic year of realisation of subject			2026/2027			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	4		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			exam			
Conducting unit	Department Of Informatics In Management -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor								
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	30.0	0.0	30.0	0.0		0.0	60	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in classes include plan			Self-study		SUM		
	Number of study hours	60		5.0		35.0		100	
Subject objectives	The aim of the course is to introduce the theory and practice of using information technologies and systems by organizations to achieve strategic goals and implement digital transformation.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U07] uses advanced information technologies to enhance data analysis and decision-making processes.		algorithms that can support the enterprise in making informed decisions, achieving strategic goals, and delivering value to customers and stakeholders.			[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment			
	[K6_W02] possesses advanced knowledge of methods and techniques that enable precise formulation and effective problem solving.		Selects information technology methods and techniques for identifying, diagnosing, and solving problems occurring within an enterprise and its socio- economic environment.			[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge
