

Subject card

Subject name and code	Sound Reinforcement - Laboratory, PG_00048329							
Field of study	Electronics and Telecommunications							
Date of commencement of studies	February 2026		Academic year of realisation of subject			2026/2027		
Education level	second-cycle studies		Subject group			Optional subject group Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction		Polish			
Semester of study	2		ECTS credits		1.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department Of Multimedia Systems -> Faculty Of Electronics Telecommunications And Informatics -> Wydziały Politechniki Gdańskiej							
Name and surname	Subject supervisor		dr inż. Piotr Odya					
of lecturer (lecturers)	Teachers		dr inż. Piotr Odya dr inż. Karolina Marciniuk mgr inż. Wanda Ludwikowska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
	Number of study hours	0.0	0.0	15.0	0.0		0.0	15
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	vity Participation in d classes included plan				Self-study		SUM
	Number of study hours	15		2.0		8.0		25
Subject objectives	The aim of the course is to familiarize students with the room acoustics and sound reinforcement technology and knowledge transfer in the acoustic CADs.							

Data wygenerowania: 24.04.2025 18:57 Strona 1 z 2

	[K7_U07] can apply advanced methods of process and function support, specific to the field of study [K7_U08] while identifying and formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work [K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment [K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of physics and other areas of science	Student designs sound reinforcement system using acoustic CAD (CATT-Acoustic and ODEON systems). Student uses acoustic CAD (CATT-Acoustic and ODEON systems) to design and simulate acoustics of rooms and sound reinforcement systems. The student is able to make an economic and technical analysis of choosed solutions in the field of acoustics and sound reinforcement. Student designs rooms acoustics and sound reinforcement systems using acoustic CADs (CATT-Acoustic and ODEON systems). Student designs acoustic interiors (eg. radio studios, auditoria, musical theaters, churches, etc.) The student is able to assess the quality of acoustic interiors.	[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment [SU4] Assessment of task fulfilment				
	formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work [K7_U03] can design, according to required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment [K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of	(CATT-Acoustic and ODEON systems) to design and simulate acoustics of rooms and sound reinforcement systems. The student is able to make an economic and technical analysis of choosed solutions in the field of acoustics and sound reinforcement. Student designs rooms acoustics and sound reinforcement systems using acoustic CADs (CATT-Acoustic and ODEON systems). Student designs acoustic interiors (eg. radio studios, auditoria, musical theaters, churches, etc.)	present the results of task [SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information [SU1] Assessment of task fulfilment [SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment [SU4] Assessment of task fulfilment				
	required specifications, and make a complex device, facility, system or carry out a process, specific to the field of study, using suitable methods, techniques, tools and materials, following engineering standards and norms, applying technologies specific to the field of study and experience gained in the professional engineering environment [K7_U02] can perform tasks related to the field of study as well as formulate and solve problems applying recent knowledge of	and sound reinforcement systems using acoustic CADs (CATT-Acoustic and ODEON systems). Student designs acoustic interiors (eg. radio studios, auditoria, musical theaters, churches, etc.) The student is able to assess the	present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task				
	related to the field of study as well as formulate and solve problems applying recent knowledge of	(eg. radio studios, auditoria, musical theaters, churches, etc.) The student is able to assess the	use methods and tools [SU1] Assessment of task				
Subject contents		· · ·					
	 Introduction Acoustical design – "Odeon" Acoustical design – "CATT-Acoustic" Room sound system design Speech intelligibility testing Measurement of room acoustic parameters Real reinforcement system - technical tour Credit for a course 						
Prerequisites and co-requisites	No requirements						
Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade				
and criteria	Practical exercise	51.0%	100.0%
