

Subject card

Subject name and code	MSc Diploma Thesis I, PG_00064260								
Field of study	Biomedical Engineering, Biomedical Engineering								
Date of commencement of studies	February 2026		Academic year of realisation of subject			2026/2027			
Education level	second-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form		assessment				
Conducting unit	Department Of Biomedical Engineering -> Faculty Of Electronics Telecommunications And Informatics -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor		dr hab. inż. Ewa Wagner-Wysiecka						
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	Project Semi		SUM	
	Number of study hours	0.0	0.0	0.0	0.0		0.0	0	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	0		30.0		70.0		100	
Subject objectives	To familiarize studen method of evaluation								

Data wygenerowania: 26.04.2025 07:14 Strona 1 z 2

IR7_U10] can individually plan and pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and communication technologies (ICT), and communication technologies (ICT), and communication technologies (ICT), and communication technologies (ICT), and communication specialist issues with diverse recipients, appropriately justify points of vew, load debates, present, assesses and discussed very recipients, appropriately justify or level, to well as use specialist terminology related to the field of study in communication	Learning outcomes	Course outcome	Subject outcome	Method of verification				
formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested solutions and engineering work [K7_K02] is ready to provide critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical problems [K7_K03] is ready to meet social obligations, inspire and organise activities for the social environment, initiate actions for the public interest, think and act in an entrepreneurial way		pursuit their own lifelong education and influence others in this aspect, also by means of advanced information and communication technologies (ICT), and communicate on specialist issues with diverse recipients, appropriately justify points of view, hold debates, present, assess and discuss different opinions and points of view, as well as use specialist terminology related to the field of	techniques of data modeling, key standards for IT systems and equipment, medical security techniques, computer methods of supporting diagnostics, and TI used in various fields of					
Critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical problems [KT_K03] is ready to meet social obligations, inspire and organise activities for the social environment, initiate actions for the public interest, think and act in an entrepreneurial way Subject contents		formulating engineering tasks specifications and solving these tasks, can: - apply analytical, simulation and experimental methods, - notice their systemic and non-technical aspects, - make a preliminary economic assessment of suggested	modeling techniques, key standards for information systems. The student knows the principles of intellectual property protection. Understands the impact of their activities on the economics and					
Obligations, inspire and organise activities for the social environment, initiate actions for the public interest, think and act in an entrepreneurial way Subject contents		critical evaluation of received content and to acknowledge the importance of knowledge in solving cognitive and practical	understands the principles of scientific work, research methods, and determine the conditions of	solve problems that arise in				
methods. Testing, calculations, analysis of the results, the project proposal. The implementation of the project. Comparative analysis, conclusions.
