

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Descriptive Statistics, PG_00067932								
Field of study	Economics								
Date of commencement of studies	October 2025		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			field	Obligatory subject group in the field of study		
						Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish	Polish		
Semester of study	2		ECTS credits			5.0	5.0		
Learning profile	general academic profile		Assessment form			exam	exam		
Conducting unit	Department Of Statistics And Econometrics -> Faculty Of Management And Economics -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor								
of lecturer (lecturers)	Teachers				-				
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
of instruction	Number of study hours	30.0	0.0	30.0	0.0		0.0	60	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	60	5.0		60.0		125		
Subject objectives	Selects an appropriate methodology for testing regularities occurring in mass processes, using statistical software to process data and interpret obtained results.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U07] uses advanced information technologies to enhance data analysis and decision-making processes.		statistical data analysis and			[SU3] Assessment of ability to use knowledge gained from the subject			
	[K6_W02] possesses advanced knowledge of methods and techniques that enable precise formulation and effective problem solving.		knows basic statistical methods that support precise problem formulation and analysis			[SW1] Assessment of factual knowledge			

Subject contents	Population and sample
	Full and partial tests
	Random and non-random selection methods
	Classification of statistical characteristics
	The concept of a random variable and basic information about distributions (discrete, continuous)
	Importance of measures of central tendency
	Differences between classic and positional measures
	Arithmetic mean, harmonic mean, median, dominant, quartiles, percentiles
	Importance of measures of variation
	Variance, standard deviation, coefficient of variation, quadrant deviation, positional coefficient of variation,
	range, decile range
	Box-and-whisker plot
	Importance of asymmetry measures
	Third central moment, asymmetry coefficient, positional asymmetry coefficient
	Third central moment, asymmetry coencient, positional asymmetry coencient
	Examples of asymmetric distributions
	Importance of measures of distribution flattening
	Fourth control moment, kurtable, positional concentration coefficient
	Fourth central moment, kurtosis, positional concentration coefficient
	Statistical series
	Histogram
	Histogram
	Distributor
	Central Limit Theorem

Verification of statistical hypotheses introductory information
Type I and II error
Test significance level
Practical applications of correlation analysis
Apparent correlation
Functional dependence and stochastic dependence
Covariance, Pearson's linear correlation coefficient, Spearman's rank correlation coefficient, Kendall's tau coefficient, gamma coefficient, Pearson's correlation relations
Scatterplot
Practical applications of the analysis of the interdependence of quality features
Contingency tables
Chi-square test of independence
V-Cramer coefficient,
Difference between correlation and regression analysis
Practical applications of regression analysis
Introduction to modeling simple regression and multiple (linear) regression
The main assumptions of KMNK
Assessment of the significance of parameters
Measures of the accuracy of the estimated model
Analysis of the dynamics of phenomena
Increments and individual indexes
Aggregate price and quantity indices (Laspeyres, Paasche, Fisher)

	Time series				
	Time series of periods and moments				
	Time series components (trend, seasonal, cyclical and random fluctuations)				
	Trend extraction (mechanical and analytical method)				
	Simple moving average				
	Exponential smoothing				
	Modern methods of data visualization				
	Errors in test preparation				
	Errors in conducting the study				
	Errors in the preparation of research results				
	Inference errors				
Prerequisites					
and co-requisites					
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade		
	written exam tutorial exam II	60.0% 60.0%	50.0% 50.0%		
December 1 1 "		00.070	150.0 /0		
Recommended reading	Basic literature				
	Barrow, M. (2017), Statistics for Economics, Accounting and Bus Studies, Harlow: Prentice Hall.				
		Newbold, P., Carlson, W.L., Thorne, B. (2019). Statistics for Business and Economics, New York: Pearson Education.			

	Supplementary literature			
		Anderson D. (2019), Essentials Of Statistics For Business & Economics, Cengage Learning		
		Bąk I.,Markiewicz I., Mojsiewicz M., Wawrzyniak K. (2021), Formulas and tables Statistical and econometric methods, CeDeWu		
	eResources addresses	Adresy na platformie eNauczanie:		
Example issues/ example questions/ tasks being completed	What is a statistical feature? Provide types of features and examples. The concept of general population and samples. Calculation and interpretation of basic descriptive measures of distribution. Knowledge of basic distributions of a random variable. Correlation coefficient (calculation method, interpretation).			
<u> </u>				
	Assumptions of the Classical Linear Regression Model (KMRL).			
	Time series components, trend analysis, measurement of seasonal fluctuations.			
	Simple methods of examining the dy	ynamics of economic phenomena, absolute growth, relative growth.		
Work placement	Not applicable
