	E-learning hours included: 0.0						
	Additional information: Interactive lecture						
	project based learning						
	Case study analysis						
	Moderated discussion						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	90		5.0		80.0	175
Subject objectives	The course aims to familiarize students with the fundamental concepts and mechanisms of the financial and banking system, including its structure, functions, and links to the economic environment. A key component of the course is the development of skills in evaluating financial instruments such as banking products, capital market instruments, and investment funds. At the same time, the course fosters teamwork, analytical thinking, and presentation skills through group projects based on real-world problems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U05] leverages the knowledge acquired in the field of economics to solve challenging problems, achieving results that are economically and socially valuable.		The student evaluates financial instruments and financial markets, and also identifies problems occurring in financial markets.		[SU5] Assessment of ability to present the results of task
