

Subject card

Subject name and code	Diploma Seminar, PG_00055526							
Field of study	Mechanical Engineering							
Date of commencement of studies	October 2025		Academic year of realisation of subject			2028/2029		
Education level	first-cycle studies		Subject group			Optional subject group		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	4		Language of instruction			Polish		
Semester of study	7		ECTS cred	3 credits		4.0		
Learning profile	general academic pro	ofile	Assessment form			assessment		
Conducting unit	Institute Of Mechanics And Machine Design -> Faculty Of Mechanical Engineering And Ship Technology -> Wydziały Politechniki Gdańskiej							
Name and surname	Subject supervisor		dr hab. inż. Szymon Grymek					
of lecturer (lecturers)	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project		Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	15.0		15
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM
	Number of study hours	15		36.0		49.0		100
Subject objectives	Expanding knowledge and developing skills for the preparation, development, write and present their scientific achievements in the form of a diploma project.

IRG_U02 is able to work in a team and individually, also in multi-disciplinary teams, is able to draw a plan of completing a construction or technological design, shows self-learning abilities IRG_U01 is able to acquire information from specialized literary sources, detabases and object occupies to compile the obbined information pieces and to interpret them, additionally is able to family information in professional literature, dischauses and object occupies them, additionally is able to family information in professional literature, dischauses and object occupies them, additionally is able to family information in professional literature, dischauses and object occupies them, additionally is able to family information in professional literature, dischauses and object occupies them, additionally is able to family information in professional literature, dischauses and to interpret them, additionally is able to family information in professional literature, dischauses and to correctly formative corrections of the results of this improvement of a simple design or technological task, including the solvedge in the description of the results of this improvement of a simple design or technological task, including the solvedge in the description of the results of the simple design to technological task, including the solvedge in the description of the results of this improvement to present the results using computer software or other aiding tools. IRG_K01 is aware of the need for complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of the incomplement of the professional conditions and control of the professional conditions and innovation in the realisation of professional projects. Subject contents	Learning outcomes	Course outcome	Subject outcome	Method of verification				
Information from specialized literary sources, databases and other resources, essential for solving engineering tasks; is able to compile the obtained information pieces and to interpret them, additionally is able to form conclusions and present justified opinion [K6, U03] is able to identify, formulate and develop the decemptation of a simple design or technological task, including the description of the results of this task in Polish or in a foreign language and to present the results using computer software or other aiding tools [K6, K01] is aware of the need for complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of control and increased in the professional projects Monoweap and to present a multimedia presentation on the work of the caching and learning, critically assesses the possessed knowledge; is aware of the need to supplement knowledge in progressional ethics; is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is aware of the need to supplement knowledge in professional ethics; is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is aware of the need to supplement knowledge in professional ethics; is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is able to show resourcefulness and innovation in the realisation of professional projects Monoweap and the project is able to show resourcefulness and the project is able to show resourcefulness and the project is able to show resourcefulness and the project is able to show the project is able to show the		and individually, also in multi- disciplinary teams, is able to draw a plan of completing a construction or technological design, shows self-learning	schedule of design or					
documentation of a simple design or technological task, including the description of the results of an engineering task in Polish and in a foreign language. Polish and in a foreign language and to present the results of this task in Polish or in a foreign language and to present the results using computer software or other aiding tools Polish and in a foreign language and to present the results using computer software or other aiding tools Polish and in a foreign language and to present the results using computer software or other aiding tools Polish and in a foreign language and to present the results of task in Polish and in a foreign language.		information from specialized literary sources, databases and other resources, essential for solving engineering tasks; is able to compile the obtained information pieces and to interpret them, additionally is able to form conclusions and present justified	necessary information in professional literature, databases and other sources and to correctly					
complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of the importance of professional conduct and following the rules of professional ethics; is able to show resourcefulness and innovation in the realisation of professional projects Subject contents		formulate and develop the documentation of a simple design or technological task, including the description of the results of this task in Polish or in a foreign language and to present the results using computer software or	multimedia presentation on the results of an engineering task in					
Prerequisites and co-requisites Assessment methods and criteria Recommended reading Basic literature Supplementary literature eResources addresses Example issues/example questions/tasks being completed Knowledge and abilities reached during a study at particular direction. Passing threshold Percentage of the final grade Passing threshold Passing threshold Percentage of the final grade Passing threshold Passing threshold Passing threshold Percentage of the final grade Passing threshold Passing threshold Passing threshold Passing threshold Percentage of the final grade Passing threshold Passing		complementing the knowledge throughout the whole life, is able to select proper methods of teaching and learning, critically assesses the possessed knowledge; is aware of the importance of professional conduct and following the rules of professional ethics; is able to show resourcefulness and innovation in the realisation of	to supplement knowledge throughout his life and is able to demonstrate innovation in	solve problems that arise in				
Commended reading Completed	Subject contents	A computer presentation of realised diploma work in accordance with its subject.						
and criteria Participation in class 80.0% Multimedia presentation 100.0% 50.0% Recommended reading Basic literature Supplementary literature eResources addresses Adresy na platformie eNauczanie: Example issues/ example questions/ tasks being completed	Prerequisites	Knowledge and abilities reached during a study at particular direction.
