

Subject card

Subject name and code	Metrology and Measurement Systems, PG_00040171						
Field of study	Mechanical Engineering						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		English		
Semester of study	2		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Manufacturing And Production Engineering -> Faculty Of Mechanical Engineering And Ship Technology -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Aleksandra Mirowska				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		7.0		48.0	100
Subject objectives	Recognition with the basic principles of metrology and preparing to conduct measurements of mechanical sizes with the analysis of the results. Rules for determining the accuracy, tolerate and fits of machine parts. Knowledge of the methods of measurement and measuring instruments.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_U05		Student explains construction and principle of operation of measurement instruments. Student chooses suitable measuring instrument for measure given quantity. Student measures. Student analyses results of measurements. Student calculates measuring errors.		[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	K6_W11		Student recognizes mechanical quantities subject to measurement. Determine measurement methods and systems.		[SW1] Assessment of factual knowledge		
Subject contents	Lectures: Basic concepts in metrology: measurement, units of measurement, standards and instruments. Accuracy and uncertainty. Geometrical Product Specifications - GPS. Basics of tolerances, deviations and fits. Geometric tolerances. General tolerances. Tolerances of linear and angular dimensions without individual tolerance markings. Fundamentals of measurement (repeatability and reproducibility of the measuring instrument). Texture of surfaces. Methods and metrological equipment and principles of its selection. Laboratory: Measurements of external, internal, mixed and intermediate dimensions. Measurements of angles, . Measurements of surface texture and contours. Measurements using altimeters. 2D measurements. Coordinate measuring technique. Exercises: Measurements and their uncertainty (Measurement errors, uncertainty, uncertainty budget and statistical processing of measurement results). Tolerances and fits. Dimensional chains. Tolerancing of component dimensions.						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	50.0%	30.0%
	Lecture	50.0%	40.0%
	Exercises	50.0%	30.0%
