

Subject card

Subject name and code	Diploma Seminar, PG_00060566						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2028/2029		
Education level	first-cycle studies		Subject group		Optional subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		Polish		
Semester of study	7		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute Of Naval Architecture -> Faculty Of Mechanical Engineering And Ship Technology -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Zbigniew Korczewski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		3.0		67.0	100
Subject objectives	Acquiring the ability to prepare and present a diploma thesis						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task		Student can develop and present engineering report in the field of construction and operation of ships and marine equipment		[SU5] Assessment of ability to present the results of task		
	[K6_U01] can obtain information from literature, databases and other sources, can verify and organize the obtained information, interpret them and form conclusions and justified opinions		Student follows professional literature and applies the acquired knowledge in practice enriching possessed skills and engineering experience this way.		[SU4] Assessment of ability to use methods and tools		
	[K6_K01] is aware of the need of constant improvement within the range of the possessed job and knows the possibilities of further education		Student understands the need to constantly improve his knowledge and engineering skills to keep up with the dynamic global development of technique and technology in the field of construction and operation of ships and marine equipment.		[SK2] Assessment of progress of work		
Subject contents	Acquainting students with the form of writing a thesis and preparing a presentation. Each student presents the next stages of their diploma thesis during the class. The presented content, both descriptive and in the form of drawing documentation and calculations, is the subject of discussion and preliminary assessment. This allows you to improve your skills in presenting technical issues, and also allows you to correct any errors and shortcomings on an ongoing basis						
Prerequisites and co-requisites	Knowledge and skills in the field of subjects taught in the field of study and specialization.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
			60.0%		100.0%		
Recommended reading	Basic literature		Literature selected for the subject of the diploma thesis				
	Supplementary literature		Supplementary literature on the methodology of writing diploma theses.				
	eResources addresses		Adresy na platformie eNauczanie:				

Example issues/ example questions/ tasks being completed	
Work placement	Not applicable
