

Subject card

Subject name and code	Selected issues of technology, PG_00060551						
Field of study	Design and Construction of Yachts, Naval Architecture and Offshore Structures						
Date of commencement of studies	October 2025	Academic year of realisation of subject			2027/2028		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			8.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Faculty Of Mechanical Engineering And Ship Technology -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Jakub Kowalski				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	45.0	0.0	15.0	30.0	0.0	90
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	90		9.0		101.0	200
Subject objectives	The purpose of the course is to teach students about the current problems in the construction of metal hulls						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U04] has skills that allow for self-education and preparation for work in an industrial environment, including the application of occupational health and safety rules		The student is able to independently search and verify knowledge and apply it to the task at hand		[SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	[K6_U02] can work individually and in a team, communicate through various techniques in professional environment and also record, analyse, and present the results of work, can estimate the time needed to complete a given task		The student is able to consciously plan (individually or in a group) and document the work of the realized task		[SU1] Assessment of task fulfilment		
	[K6_W02] has knowledge in the field of technical mechanics, fluid mechanics, strength of materials, necessary to understand the basic physical phenomena occurring in ocean engineering		The student is able to apply knowledge of basic science to solve a complex problem		[SW2] Assessment of knowledge contained in presentation		
Subject contents	<p>Lecture: The content of the lecture focuses on current industrial problems related to the construction and outfitting of steel hulls. Among other issues, the following will be discussed: joining of dissimilar materials, hull assembly at the launching site, measurements and industrial testing</p> <p>Laboratory Participation of students in current research at the Institute in the fields of mechanics, strength, fracture and fatigue of materials or ship technology.</p>						

Prerequisites and co-requisites	Basic knowledge of the following subjects: - mechanics - strength of materials - hull technology		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		100.0%	33.0%
		100.0%	33.0%
		60.0%	34.0%
Recommended reading	Basic literature	<p>Classification societies' regulations and the standards indicated in the classes</p> <p>Lamb, Thomas. (2003 - 2004). Ship Design and Construction, Volumes 1-2; Society of Naval Architects and Marine Engineers (SNAME). Book available from the Knovel database (accessed through the PG library website)</p> <p>Bruce, George J. Eyres, David J.. (2012). Ship Construction (7th Edition).Elsevier. Book available from Knovel database (accessed through PG library website)</p> <p>I. Lotsberg, Fatigue Design of Marine Structures. Cambridge University Press, 2016. book available from Knovel database (accessed through PG library website).</p>	
	Supplementary literature	scientific articles indicated by the lecturer internet sources	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Purpose and procedure for determining CTOD for welded joints Procedure for launching from a longitudinal slope		
Work placement	Not applicable
