

Subject card

Subject name and code	Physics, PG_00055063						
Field of study	Management and Production Engineering						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		5.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Institute Of Naval Architecture -> Faculty Of Mechanical Engineering And Ship Technology -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Małgorzata Śmiałek-Telega				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		4.0		61.0	125
Subject objectives	Acquiring knowledge that is the subject of modern physics						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U02] has the ability of self-learning and expanding knowledge in a specialized field of engineering production		The student has the ability to analyze information and use methods to expand specialist knowledge in the field of production engineering.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools		
	[K6_W01] has knowledge of linear algebra, differential equations, analysis and mathematical statistics useful for modelling and interpreting mechanical systems, manufacturing processes and operating properties of devices, has structured knowledge of physics including classical mechanics, optics, electricity and magnetism, demonstrates knowledge of elements of quantum physics		The student has ordered knowledge of modern physics, optics, electricity and magnetism, demonstrates the knowledge of the elements of quantum physics		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_K03] is aware of the social role of a graduate of a technical university, understands the importance of non-technical aspects and effects of engineering activities including their impact on the environment and responsibility for decisions, sees the need to formulate and provide the public with information and opinions on the achievements of technology, correctly identifies and resolves dilemmas associated with the job of an engineer		student understands the importance of non-technical aspects and effects of engineering activities, including its impact on the environment		[SK5] Assessment of ability to solve problems that arise in practice [SK2] Assessment of progress of work		

Subject contents	1. Mathematical introduction. 2. Electromagnetic waves 3. Wave optics 4. Lasers 5. Lidars 6. Schrödinger equation; examples of solutions to the Schrödinger equation: 7. Models of the atom 8. Stern-Gerlach experiment and electron spin. 9. Multi-electron atoms; Zeeman effect and spin-orbit coupling; 10. Physics of the atomic nucleus 11. Radioactivity 12. Electric conductivity 13. Quantum computers		
Prerequisites and co-requisites	Knowledge of classical physics		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exercises	50.0%	35.0%
	Lecture	50.0%	30.0%
	Laboratory	50.0%	35.0%
Recommended reading	Basic literature	Fizyka dla Szkół Wyższych Tom 3 https://openstax.org/details/books/fizyka-dla-szk%C3%B3%C5%82-wy%C5%BCszych-tom-3	
	Supplementary literature	D. Halliday, R. Resnick, J. Walker, Podstawy fizyki, t5, PWN	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	1. Particle-wave nature of light and matter. 2. Heisenberg uncertainty principles. Schrödinger equation and examples of its solutions. 3. Schrödinger equation of hydrogen atom, quantum numbers. 4. Stern-Gerlach experiment, spin of electron. 5. Spin-orbit coupling, total momentum of electron in atom. 6. Zeeman phenomena, Models of nucleus: liquid drop model, Fermi gas model, shell model. 7. Quantum statistics.		
Work placement	Not applicable		

Document generated electronically. Does not require a seal or signature.
