

。 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Safety of Electrical Power Engineering System, PG_00003478								
Field of study	Electrical Engineering								
Date of commencement of studies	October 2025		Academic year of realisation of subject			2026/2027			
Education level	second-cycle studies		Subject group			Specialty subject group Subject group related to scientific research in the field of study			
Mode of study	Part-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			1.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department Of Electrical Power Engineering -> Faculty Of Electrical And Control Engineering -> Wydziały Politechniki Gdańskiej						> Wydziały		
Name and surname	Subject supervisor		prof. dr hab. inż. Ryszard Zajczyk						
of lecturer (lecturers)	Teachers								
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Project		Seminar	SUM	
of instruction	Number of study	10.0	0.0	0.0	0.0		0.0	10	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation ir classes includ plan	n didactic ed in study	Participation i consultation h	n Iours	Self-study		SUM	
	Number of study hours	10	2.0			13.0		25	
Subject objectives	To provide students with the problems of security of the power system.								
Learning outcomes	Course outcome Subject outcome Method of verification								
	[K7_U10] is able to calculate short- circuit currents, select substation equipment including power system automation protection automatics		Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.			[SU1] Assessment of task fulfilment			
	[K7_W03] has an extended and deepened knowledge of the field related to electrical power systems and electrical equipment		Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.			[SW2] Assessment of knowledge contained in presentation			
	[K7_W05] has detailed knowledge of the regulatory processes in the electricity system electricity system, electricity safety and electricity safety automation		Student recognizes the basic issues as regards safety of the power system, explains basic processes occuring in the power system during emergency states as well as interprets occurences and processes occuring in the power system.			[SW3] Assessment of knowledge contained in written work and projects			
Subject contents	The security of the Power system in time horizons. The existent structures of generating and transmitting electric energy, international connections, organisational and financial connections, emergency automation and restitution procedures and theis influence on power security. Methodology of forecasts/ prognoses demands for electric energy. The scope and results of privatization of electrical power engineering sector. The influence of market economy and international commitments. The impact of dispersed/ distributed generation on the power system. The importance of security automation and system automation in the process of stability loss, subsystems and islands? defence arrangements and restitution of the power system. Computer simulations of the system breakdowns.								
and co-requisites		an ower engin	comy, rower	ayaicina, aului	nation (n secul			

Assessment methods	Subject passing criteria	Passing threshold	Percentage of the final grade		
and criteria	Midterm colloquium	60.0%	100.0%		
Recommended reading	Basic literature	 Machowski J., Bernas S.: Stany nieustalone i stabilność systemu elektroenergetycznego. Warszawa WNT 1989. 			
	Supplementary literature	 Kundur P.: Power System Stability and Control. McGraw-Hill, Inc. 1994. 			
	eResources addresses	Adresy na platformie eNauczanie:			
Example issues/ example questions/ tasks being completed	Examples of questions and issues to	develop served during the lectures.			
Work placement	Not applicable
