

## Subject card

| Subject name and code                       | Programming, PG_00021027  |                                  |  |            |            |  |         |     |  |
|---|---|----------------------------------|--|------------|------------|--|---------|-----|--|
| Field of study                              | Mathematics   |                                  |  |            |            |  |         |     |  |
| Date of commencement of studies             | October 2025  |                                  | Academic year of realisation of subject  |            |            | 2025/2026  |         |     |  |
| Education level                             | first-cycle studies   |                                  | Subject group  |            |            | Obligatory subject group in the field of study Subject group related to scientific   |         |     |  |
| Mode of study                               | Full-time studies   |                                  | Mode of delivery   |            |            | research in the field of study at the university   |         |     |  |
| Year of study                               | 1   |                                  | Language of instruction  |            |            | Polish   |         |     |  |
| Semester of study                           | 2   |                                  | ECTS credits   |            |            | 5.0  |         |     |  |
| Learning profile                            | general academic profile  |                                  | Assessment form  |            |            | assessment   |         |     |  |
| Conducting unit                             | Department Of Probability Theory And Biomathematics -> Faculty Of Applied Physics And Mathematics -> Wydziały Politechniki Gdańskiej  |                                  |  |            |            |  |         |     |  |
| Name and surname of lecturer (lecturers)    | Subject supervisor  |                                  | dr inż. Paweł Wojda  |            |            |  |         |     |  |
|   | Teachers  |                                  | dr inż. Paweł Wojda  |            |            |  |         |     |  |
|   |   |                                  | mgr inż. Katarzyna Tessmer   |            |            |  |         |     |  |
| Lesson types and methods of instruction     | Lesson type   | Lecture                          | Tutorial   | Laboratory | Projec     | t  | Seminar | SUM |  |
|   | Number of study hours   | 30.0                             | 0.0  | 30.0       | 0.0        |  | 0.0     | 60  |  |
|   | E-learning hours included: 0.0  |                                  |  |            |            |  |         |     |  |
|   | Adresy na platformie eNauczanie:  |                                  |  |            |            |  |         |     |  |
| Learning activity and number of study hours | Learning activity   | Participation i classes included |  |            | Self-study |  | SUM     |     |  |
|   | Number of study hours   | 60                               |  | 5.0        |            | 60.0   |         | 125 |  |
| Subject objectives                          | Mastering the ability to write simple algorithms in the selected programming language; compiling, starting and testing simple programs. Mastering the skill of analyzing simple algorithms. |                                  |  |            |            |  |         |     |  |
| Learning outcomes                           | Course outcome  |                                  | Subject outcome  |            |            | Method of verification   |         |     |  |
|   | K6_K03  |                                  | Student in laboratory: - implements three independent programs.  |            |            | [SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness [SK2] Assessment of progress of work |         |     |  |
|   | K6_W09  |                                  | Student: - uses software<br>development tools for C/C++, -<br>uses internet to find information<br>about C/C++ and programming |            |            | [SW1] Assessment of factual knowledge  |         |     |  |
|   | K6_U07  |                                  | Student: - designs simple algorithms and their tests.  |            |            | [SU4] Assessment of ability to use methods and tools   |         |     |  |
|   | K6_W08  |                                  | Student: - recognizes elements of programs and explains their meaning - enumerates program quality criteria.                   |            |            | [SW1] Assessment of factual knowledge  |         |     |  |
