

Subject card

Subject name and code	Environmental physics laboratory, PG_00037302						
Field of study	Technical Physics						
Date of commencement of studies	October 2025	Academic year of realisation of subject				2026/2027	
Education level	first-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	4	ECTS credits				2.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Katedra Fizyki Atomowej i Luminescencji -> Faculty Of Applied Physics And Mathematics -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The aim of the course is to acquaint a student with selected physical processes in environment and acquisition of skills in the field measurements. By participating in the laboratory and field classes the student acquires skills of specialist measuring instruments.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U04] plans and conduct experiments, critically analyzes their results, draw conclusions and forms opinions, has laboratory work experience	Is able to plan and carry out environmental measurements of physical quantities using the corresponding instruments.			[SU1] Assessment of task fulfilment		
	[K6_W07] has knowledge of the construction and operation of physical instruments, measurement and research equipment	The student learns the principles of operation of theodolite, leveling agent, sextant, magnetometer, ionizing radiation detector and other measuring devices			[SW1] Assessment of factual knowledge		
	[K6_W08] has knowledge of planning and conducting physical experiments, and critical analysis of its results	Student is capable of planning and carrying out the experiment in the field			[SW1] Assessment of factual knowledge		
Subject contents	Sun (construction, nuclear fusion reactions, chemical composition, interaction with the Earth) Processes and physical effects associated with the impact of the Sun-Earth Earth (shape and structure of the Earth, physical models used to describe the structure of the Earth, isostasy, seismology, seismic waves) The winds in the atmosphere						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		50.0%	100.0%

	eResources addresses	Adresy na platformie eNauczenie:	
Example issues/ example questions/ tasks being completed	Working with a precision laser leveling - determination of the amount of selected control points (field measurements) Calculating the azimuth of the coordinates and work with precision electronic theodolite - determination of coordinates based on field measurements Gaining practical skills in the use of sextant, learning methods for determining the geographical position using the position of the sun.		
Work placement	Not applicable
