

Subject card

Subject name and code	Teleinformatic networks, PG_00060226								
Field of study	Technical Physics								
Date of commencement of studies	October 2025	Academic year of realisation of subject		2027/2028					
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study				
Mode of study	Full-time studies		Mode of delivery		at the university				
Year of study	3		Language of instruction		Polish				
Semester of study	5		ECTS credits		3.0				
Learning profile	general academic profile		Assessment form		assessment				
Conducting unit	Department of Theoretical Physics and Quantum Computing -> Faculty of Applied Physics and Mathematics -> Faculties of Gdańsk University of Technology								
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Reichel						
	Teachers								
Lesson types	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM		
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45		
E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM		
	Number of study hours	45		5.0		25.0	75		
Subject objectives	Acquainted with the basic methods of data transmission, division of ICT equipment. Layer model of the ISO / OSI network.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K6_U03] knows programming languages and can use basic software packages		Can implement selected issues			[SU1] Assessment of task fulfilment			
	[K6_U02] analyzes and solves simple scientific and technical problems, based on possessed knowledge, using analytical, numerical, simulation and experimental methods		Can analyze network logs (e.g., Wireshark)			[SU2] Assessment of ability to analyse information			
	[K6_K01] understands the need to learn and improve professional and personal competencies, inspires and organizes other people's learning process		Can read and understand datasheets			[SK5] Assessment of ability to solve problems that arise in practice			

Subject contents	<p>Course content – lecture</p> <p>Lectures:</p> <p>1. Elements of data transmission Channel, signal, information and modulation: parameters and characteristics. Spectrum, bandwidth, Modulation rate, transmission speed, propagation rate. Synchronous and asynchronous transmission. Receiver synchronization and transmission coding. Error models in transmission channels, elementary error rate. Detection and correction codes. Parity bit and CRC.</p> <p>2. LAN and WLAN Ethernet (IEEE 802.3): access rule for common medium, device addressing, technologies and parameters, structured cabling, devices (hub, switch). Fast- (IEEE 802.3u) and Gigabit Ethernet (IEEE 802.3 ab / z). Minimal spanning tree (STP). Other solutions: Token Ring and FDDI (IEEE 802.5):</p> <p>3. Access network Access channels: V.24 (RS232), USB, V.21-V.92 modems, ISDN, ADSL and HDSL modems. Parameters and ranges of application.</p> <p>4. MAN and WAN network Analog and digital connections: PDH and SDH telecommunications hierarchy. FrameRelay network: principle of operation, layered model, permanent and switched virtual connection, parameters and costs of application. ATM network: operating principle, layered model, logical channel and path, devices. Parameters and scope of application.</p> <p>5. Protocols and services in ICT networks Protocol definition and protocol classification. Protocols in layered models. Ethernet II ARP ICMP IP TCP and UDP DNS HTTP MQTT</p> <p>6. Security. Symmetric / asymmetric encryption. Weaknesses and strengths of selected solutions. Attack methods (e.g. Man in the Middle)</p> <hr/> <p>Course content – laboratory Laboratory</p> <p>1) Implementation of algorithms: parity bit, modulo sum, CRC 2) The breakdown of the data on to packets, analysis of impact of the size of the header to the size of the package 3) Implementation of minimum spanning tree algorithms 4) Tracking and analysis of the network traffic</p>						
Prerequisites and co-requisites	No requirements						
Assessment methods and criteria	<table border="1"> <thead> <tr> <th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr> </thead> <tbody> <tr> <td>Project</td><td>50.0%</td><td>100.0%</td></tr> </tbody> </table>	Subject passing criteria	Passing threshold	Percentage of the final grade	Project	50.0%	100.0%
Subject passing criteria	Passing threshold	Percentage of the final grade					
Project	50.0%	100.0%					
Recommended reading	<table border="1"> <tbody> <tr> <td>Basic literature</td><td>D.E. Comer , Sieci komputerowe i sieci, WNT, Warszawa, 2003 A. Sopala, Pisanie programów internetowych, Mikom, Warszawa, 2000</td></tr> <tr> <td>Supplementary literature</td><td>No requirements</td></tr> <tr> <td>eResources addresses</td><td></td></tr> </tbody> </table>	Basic literature	D.E. Comer , Sieci komputerowe i sieci, WNT, Warszawa, 2003 A. Sopala, Pisanie programów internetowych, Mikom, Warszawa, 2000	Supplementary literature	No requirements	eResources addresses	
Basic literature	D.E. Comer , Sieci komputerowe i sieci, WNT, Warszawa, 2003 A. Sopala, Pisanie programów internetowych, Mikom, Warszawa, 2000						
Supplementary literature	No requirements						
eResources addresses							
Example issues/ example questions/ tasks being completed	<p>List the layers of the TCP/ISO model.</p> <p>Provide the physical basis for electromagnetic signal propagation (list possible modulations).</p> <p>Provide/describe the algorithm(s) for minimal spanning networks.</p>						
Practical activites within the subject	Not applicable						

Document generated electronically. Does not require a seal or signature.
