

Subject card

Subject name and code	Databases and data warehouses, PG_00062741						
Field of study	Technologies for Industry 5.0						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2026/2027		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute Of Physics And Applied Computer Science -> Faculty Of Applied Physics And Mathematics -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Bartosz Reichel				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Acquiring knowledge and skills related to relational and non-relational databases, as well as data warehouses.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U06] performs analysis, exploration and cleaning of data sets, can use statistical models and machine learning models, integrate various analytical, management and data storage tools		The student analyzes, explores, and transforms data sets using relational and non-relational databases, and is able to integrate various data analysis, management, and storage tools using data warehouses.		[SU1] Assessment of task fulfilment		
	[K6_W06] demonstrates knowledge related to data analysis and engineering, machine learning, knows the principles of integrating data with management systems to analyze complex engineering and technological problems		The student demonstrates knowledge of relational and non-relational databases and data warehouses in order to analyze complex engineering and technological problems.		[SW1] Assessment of factual knowledge		

Subject contents	Introduction to Databases (2 hours)		
	Examples of popular database systems.Relational Databases and SQL (6 hours)		
	Relational Database Extensions (3 hours)		
	NoSQL Databases as Exemplar of MongoDB (4 hours)		
	Aggregations and Queries in MongoDB.Data Warehouses (4 hours)		
	ETL (Extract, Transform, Load) process (4 hours)		
	Dimensions in a data warehouse (3 hours)		
	Data analysis (4 hours)		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	exam	60.0%	50.0%
	laboratory test	60.0%	50.0%
