

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Fundamentals of Chemistry in Environmental engineering I, PG_00058739							
Field of study	Environmental Engineering							
Date of commencement of studies	October 2025		Academic year of realisation of subject			2025/2026		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery			at the university		
Year of study	1		Language of instruction			Polish		
Semester of study	1		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department Of Environmental Engineering Technology -> Faculty Of Civil And Environmental Eng Wydziały Politechniki Gdańskiej				Engineering ->			
Name and surname	Subject supervisor dr inż. Karolina Fitobór							
of lecturer (lecturers)	Teachers							
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	t	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0		0.0	30
	E-learning hours inclu			i				
Learning activity and number of study hours	Learning activity	Participation in classes includ plan				Self-study		SUM
	Number of study hours	30	0.0			20.0		50
Subject objectives	Review of fundamental issues of the general chemistry (including inorganic chemistry, electrochemistry, chemical kinetics), introduction to the chemistry in civil engineering, environmental chemistry and acquiring the ability to perform basic chemical analyzes (qualitative and quantitative tests of water and wastewater).							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_U09] is able to use well- chosen methods and measuring devices that enable determination of basic parameters of the water treatment process and wastewater treatment; can perform simple laboratory tests leading to the assessment of water quality, pollutant load in sewage		Student is able to use properly selected methods and devices and to prepare and perform basic physico-chemical laboratory tests.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject		
		quality,						
		ctured and knowledge in and biology, necessary to nological water er treatment,	knowledge (w in the field of of knowledge ne understand te processes rela wastewater tro		oasis) uding nd ell as	contair	Assessment o ned in present Assessment o odge	tation
