

Subject card

Subject name and code	, PG_00058996						
Field of study	Environmental Engineering						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2025/2026		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		9.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Environmental Engineering Technology -> Faculty Of Civil And Environmental Engineering -> Wydziały Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Karolina Fitobór				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	16.0	16.0	0.0	0.0	62
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	62		8.0		155.0	225
Subject objectives	Repetition and consolidation regarding general chemistry and introduction to building chemistry and environmental chemistry, as well as the ability to perform basic laboratory analyzes (qualitative and quantitative tests of water and sewage) and chemical calculations.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U09] is able to use well-chosen methods and measuring devices that enable determination of basic parameters of the water treatment process and wastewater treatment; can perform simple laboratory tests leading to the assessment of water quality, pollutant load in sewage		The student is able to use properly selected methods and devices, and is able to perform simple laboratory tests.		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		
	[K6_W03] has a structured and theoretically founded knowledge in the field of chemistry and biology, including knowledge necessary to understand the technological processes related to water treatment, wastewater treatment, waste management and sludge management		The student has well structured and theoretically based knowledge in the field of chemistry, including the knowledge necessary to understand the technological processes related to water treatment, wastewater treatment, waste and sludge management.		[SW1] Assessment of factual knowledge		
Subject contents	Basic issues regarding general chemistry (including the structure of matter, kinetics of chemical reaction equations, stoichiometry, inorganic chemistry, physical chemistry), as well as the most important issues in the field of building chemistry and environmental chemistry (with particular emphasis on water and sewage chemistry).						
Prerequisites and co-requisites	The ability to use knowledge from lectures during laboratory classes.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Lectures - passed test		60.0%		60.0%		
	Laboratory classes + tutorials - completion of the course on the basis of a passed tests, reports etc.		60.0%		40.0%
