

Subject card

| Subject name and code | High conctrete buildings and steel, PG_00044332 | | | | | | | | |
|---|---|---|--|-------------------------------------|--------|---|------------|-----|--|
| Field of study | Civil Engineering | | | | | | | | |
| Date of commencement of studies | October 2025 | | Academic year of realisation of subject | | | 2026/2027 | | | |
| Education level | second-cycle studies | | Subject group | | | Optional subject group Subject group related to scientific research in the field of study | | | |
| Mode of study | Part-time studies | | Mode of delivery | | | e-lear | e-learning | | |
| Year of study | 2 | | Language of instruction | | | Polish | | | |
| Semester of study | 4 | | ECTS credits | | | 3.0 | | | |
| Learning profile | general academic profile | | Assessment form | | | assessment | | | |
| Conducting unit | Department of Concrete Structures -> Faculty Of Civil And Environmental Engineering -> Wydziały Politechniki Gdańskiej | | | | | | | | |
| Name and surname of lecturer (lecturers) | Subject supervisor | dr hab. inż. Andrzej Ambroziak | | | | | | | |
| | Teachers | | | | | | | | |
| Lesson types and methods of instruction | Lesson type | Lecture | Tutorial | Laboratory | Projec | t | Seminar | SUM | |
| | Number of study hours | 15.0 | 10.0 | 0.0 | 0.0 | | 0.0 | 25 | |
| | E-learning hours included: 25.0 | | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in did classes included ir plan | | Participation in consultation hours | | Self-study | | SUM | |
| | Number of study hours | 25 | | 5.0 | | 45.0 | | 75 | |
| Subject objectives | The aim of the course is to familiarize students with the principles of designing tall buildings, to learn the methods of calculating and dimensioning basic structural elements, as well as to develop the skills to determine the load-bearing capacity of reinforced concrete elements. | | | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | | | |
| | improvement; obeys the | | The student understands the need to improve professional qualifications and observe the rules of professional ethics. | | | | | | |
| | [K7_U02] can design and dimension complex steel, concrete (including reinforced), wood and masonry construtions and its details | | The student has knowledge of the construction of concrete structural elements. | | | | | | |
| | | | The student is able to use the principles of construction and dimensioning of reinforced concrete elements in a practical way. | | | | | | |
| Subject contents | Preliminary issues - historical outline of tall buildings. Structural systems of residential, hotel and office buildings. Factors influencing the formation of the structure (object function, construction materials, technology, durability). Basic and exceptional loads. Building spatial stiffness - resistance to horizontal and vertical forces. Static diagrams and static quantities - classical analytical methods, FEM. Dimensioning of structural elements on the basis of existing standards and regulations, reinforcement shaping. Examples of completed tall buildings. | | | | | | | | |
| Prerequisites and co-requisites | | | | | | | | | |
| Assessment methods and criteria | Subject passing criteria | | Passing threshold | | | Percentage of the final grade | | | |
| | Passing exercises | | - | | | 50.0% | | | |
| | Exam | | 60.0% | 60.0% | | | 50.0% | | |
