

## Subject card

Subject name and code	ROAD GEODESY, PG_00044853						
Field of study	Geodesy and Cartography						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	first-cycle studies		Subject group		Optional subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		6.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department Of Geodesy -> Faculty Of Civil And Environmental Engineering -> Wydziały Politechniki GdańskieJ						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		82.0	150
Subject objectives	The aim is to familiarize with the geodetic monitoring basic structural elements of buildings and road surfaces.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W10] has elementary knowledge and understands the concepts of architecture and urban planning, construction, environmental engineering and transport necessary to carry out studies related to planning and investment service		has elementary knowledge and understands concepts in the field of construction, environmental engineering and transport necessary to carry out studies related to the planning and service of investments				
	[K6_W07] has a well-established knowledge and understands concepts in the field of engineering geodesy including the use of calculations and measurements methods carried out with the use of geodetic instruments and photogrammetric and remote sensing technologies related to geodetic support for investment, surveying and inventory measurements and photogrammetry with remote sensing		has well-established knowledge and understands concepts in the field of engineering geodesy, including the use of calculation methods and measurements carried out with the use of geodetic instruments as well as photogrammetric and remote sensing technologies relating to geodetic investment service, geodetic implementation and inventory measurements as well as photogrammetry and remote sensing				
Subject contents	Geodetic service of the road building.. Marking out of engineering objects. Inventory measurements. Measurements of the deformation.						
Prerequisites and co-requisites	Knowledge about elements of the civil engineering.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	practical test 2 - solving		60.0%		40.0%		
	Elaborats of computational task associated with deformation measurement		100.0%		40.0%		
	The project development section of the road		100.0%		20.0%
