

## Subject card

|   |   |  |   |                                     |  |            |     |
|---|---|--|---|-------------------------------------|--|------------|-----|
| Subject name and code                       | Feasibility Study, PG_00068459  |  |   |                                     |  |            |     |
| Field of study                              | Engineering Management  |  |   |                                     |  |            |     |
| Date of commencement of studies             | October 2025  |  | Academic year of realisation of subject   |                                     | 2027/2028  |            |     |
| Education level                             | first-cycle studies   |  | Subject group   |                                     | Optional subject group<br>Subject group related to scientific research in the field of study |            |     |
| Mode of study                               | Part-time studies   |  | Mode of delivery  |                                     | at the university  |            |     |
| Year of study                               | 3   |  | Language of instruction   |                                     | Polish   |            |     |
| Semester of study                           | 5   |  | ECTS credits  |                                     | 5.0  |            |     |
| Learning profile                            | general academic profile  |  | Assessment form   |                                     | assessment   |            |     |
| Conducting unit                             | Department Of Management Engineering And Quality -> Faculty Of Management And Economics -> Wydział Politechniki Gdańskiej   |  |   |                                     |  |            |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor  |  |   |                                     |  |            |     |
|   | Teachers  |  |   |                                     |  |            |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial  | Laboratory                          | Project  | Seminar    | SUM |
|   | Number of study hours   | 16.0   | 0.0   | 0.0                                 | 16.0   | 0.0        | 32  |
|   | E-learning hours included: 0.0  |  |   |                                     |  |            |     |
|   | Address on the e-learning platform: <a href="https://enauczanie.pg.edu.pl">https://enauczanie.pg.edu.pl</a>   |  |   |                                     |  |            |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan |   | Participation in consultation hours |  | Self-study | SUM |
|   | Number of study hours   | 32   |   | 5.0                                 |  | 88.0       | 125 |
| Subject objectives                          | a) presenting a conceptual base for the realization and use of the feasibility study,<br><br>b) presenting selected issues and trends in the realization and use of the feasibility study,<br><br>c) acquiring some practical skills in the preparation and application of a feasibility study, |  |   |                                     |  |            |     |
| Learning outcomes                           | Course outcome  |  | Subject outcome   |                                     | Method of verification   |            |     |
|   | [K6_K02] is prepared to make competent and ethical decisions to create and maintain economic, social, and environmental values, demonstrating entrepreneurial actions.  |  | is able to evaluate the feasibility and implications of planned ventures, making informed project decisions that consider their economic, social, and environmental impact.                         |                                     | [SK5] Assessment of ability to solve problems that arise in practice                         |            |     |
|   | [K6_U06] acquires specialized knowledge in the field of engineering management, demonstrating the ability to effectively plan individual work and pursue lifelong learning.   |  | is able to independently search for and apply specialized information needed to develop a feasibility study, while effectively planning their work and ongoing development in project management.   |                                     | [SU5] Assessment of ability to present the results of task                                   |            |     |
|   | [K6_W01] understands and comprehends the conditions of processes occurring in the analyzed systems at an advanced level and selects appropriate methods for their solution, taking into account the complex relationships between the analyzed phenomena.                                       |  | has knowledge that enables understanding of interdependencies among key factors affecting project success and is familiar with analytical approaches used to assess feasibility in diverse contexts |                                     | [SW3] Assessment of knowledge contained in written work and projects                         |            |     |

|  |  |  |                               |
|--|--|--|-------------------------------|
| Subject contents   | Lecture  |  |                               |
|  | Introduction to Feasibility Study; Needs Analysis Requirement Gathering; Technical and Technological Analysis; Financial and Economic Analysis; Risk Analysis and Risk Management  |  |                               |
|  | Organizational and Human Resources Analysis; Internal and External Environment Analysis  |  |                               |
|  | Project Feasibility Evaluation Criteria;   |  |                               |
|  | Laboratory   |  |                               |
|  | Introduction; Creative Techniques for Case Study Development; Needs Analysis Requirement Gathering; Technical and Technological Analysis; Financial and Economic Analysis; Risk Analysis and Risk Management; Organizational and Human Resources Analysis; Internal and External Environment Analysis; Feasibility Study Presentation  |  |                               |
| Prerequisites and co-requisites                                |  |  |                               |
| Assessment methods and criteria                                | Subject passing criteria   | Passing threshold  | Percentage of the final grade |
|  | exam   | 60.0%  | 40.0%                         |
|  | reports  | 60.0%  | 60.0%                         |
