

Subject card

Subject name and code	Digital Platforms and Services, PG_00068463						
Field of study	Engineering Management						
Date of commencement of studies	October 2025		Academic year of realisation of subject		2027/2028		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	6		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department Of Informatics In Management -> Faculty Of Management And Economics -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor						
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	0.0	16.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	24		5.0		71.0	100
Subject objectives	Designs digital platforms in the field of services for business, administration and social life						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] understands and applies methods for classifying and evaluating acquired information based on advanced general and specialized knowledge, with consideration of their application in various types of professional activities.		evaluates the usefulness of information collected to design digital platforms and services in the field of cooperation with customers and future users		[SW1] Assessment of factual knowledge		
	[K6_U07] uses advanced information technologies to enhance data analysis and management processes.		uses information technology to analyze digital service projects throughout their life cycle		[SU4] Assessment of ability to use methods and tools		
Subject contents	Digital platforms and services for e-business, services and administration in modern society Design and development of digital services User-centric approaches to design, evaluation and testing Project management for digital services Cooperation with the client and future users Lifecycle management of digital services and mobile applications Operation, development and improvement Innovations in digital services Customer value perspective as a design approach Risk assessment related to "smart" innovations in digital services						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Laboratory		60.0%		50.0%		
	Written collquium		60.0%		50.0%
