

Subject card

Subject name and code	Technical English III, PG_00040189							
Field of study	Mechanical Engineering							
Date of commencement of studies	October 2023		Academic year of realisation of subject		2025/2026			
Education level	first-cycle studies		Subject group					
Mode of study	· ·		Mode of delivery		at the university			
Year of study	3		Language of instruction		English			
Semester of study	5		ECTS credits		2.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Language Center -> Vice-Rector For		r Education					
Name and surname	Subject supervisor		mgr Witold Zbirohowski-Kościa					
of lecturer (lecturers)	Teachers							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	-		Seminar	SUM
of instruction	Number of study hours	0.0	30.0	0.0			0.0	30
	E-learning hours inclu	uded: 0.0						
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation i consultation h	articipation in onsultation hours		udy	SUM
Number of study hours		30			6.0			50
	Students reach B2 or C1 level of general English with the elements of engineering vocabulary areas. The course additionally covers basic aspects of the specialist language relevant to the fie It is concluded with the ACERT exam.							
Learning outcomes	Course outcome		Subject outcome		Method of verification			
			Is able to communicate correctly in a foreign language at CEFR B2 level in everyday life situations as well as the academic and professional environment.		[SU2] Assessment of ability to analyse information			
	resources needed to communicate		Sufficient knowledge of the vocabulary and grammar of the foreign language to communicate in general situations as well as the specialist field of study.		[SW2] Assessment of knowledge contained in presentation			
	[K6_K81] is able to cooperate in international team		Ability to communicate in a foreign language at B2 level			[SK4] Assessment of communication skills, including language correctness [SK1] Assessment of group work skills		
	[K6_K82] is equipped to participate in lectures, seminars and laboratory classes conducted in foreign language		Understanding of specialist literature and technical instructions. Understanding longer speeches and lectures.		[SK4] Assessment of communication skills, including language correctness			
	[K6_U82] is able to obtain and process information related to field of study and academic environment in foreign language at B2 level of the Common European Framework of Reference for Languages (CEFR)		Ability to obtain and process information in a foreign language at CEFR B2 level in the given field of study and academic environment.		[SU2] Assessment of ability to analyse information [SU5] Assessment of ability to present the results of task

Vocabulary: Deepening knowledge of basic and specialist terms and expressions used in technical and academic intriguisge as well as the language of vork. Exercises concerning locate districtures, describing the physical explaining processes. Introduction of specialist language in the field of Design and Production Engineering Grammar: Using grammar appropriate to the given language level: Learning of structures essential for written and virbal communication in academic and professional environments. Writing: Practising skills in writing various texts essential in academic and work environments, including reports, CVs, emails, summaries, notes, abstracts, instructions and descriptions of processes. Reading: Deepening reading comprehension of original academic and professional texts. Listening: Developing listening comprehension skills concerning workplace, academic and everyday life situations, such as: telephone conversations, interviews, customer service, lectures and presentations. Speaking: Practising communication skills in academic and vork environments, such as: the giving of presentations, but interviews, customer service, lectures and presentations. Speaking: Practising communication skills in academic and vork environments, such as: the giving of presentations of an interview and interviews, customer service, lectures and presentations. Speaking: Practising communication skills in academic and vork environments, such as: the giving of presentations of an interview and interviews and interviews. Practising and academic and duction and interviews and academic and vork environments, such as: the giving of presentations of an interview and academic and vork environments, such as: the giving of presentations and academic and vork environments, such as: the giving of presentations and academic and vork environments, such as: the giving of presentations and academic and vork environments, such as: the giving of presentations and academic and vork environments, such as: the giving of presentati	Subject contents	Syllabus contents	Syllabus contents				
Deepening knowledge of basic and specialist terms and expressions used in technical and academic language as well as the language of work. Exercises concerning laxical structures, describing the physical explaining processes. Introduction of specialist language in the field of Design and Production Engineering Grammar: Using grammar appropriate to the given language level. Learning of structures essential for written and verbal communication in academic and professional environments. Writing: Practising skills in writing various texts essential in academic and work environments, including: reports, CVs, emails, summaries, notes, abstracts, instructions and descriptions of processes. Reading: Deepening reading comprehension of original academic and professional texts. Listening: Developing listening comprehension skills concerning workplace, academic and everyday life situations, such as: telephone conversations, interviews, customer service, lectures and presentations. Speaking: Practising communication skills in academic and work environments, such as: the giving of presentations, job interviews, formal and informat conversations, negotiating, presenting arguments, solving problems, participating in case studies, conducting formal meetings, etc. Practising the correct pronunciation and informat conversations and environments and correquisities Initial requirements Initial requirements Assessment methods Subject passing criteria passing threshold Percentage of the final grade activity/speaking prices in 80.0% 20.0%							
Deepening knowledge of basic and specialist terms and expressions used in technical and academic language as well as the language of work. Electrales concerning laxical structures, describing the physical processes. Introduction of specialist language in the field of Design and Production Engineering explaining processes. Introduction of specialist language in the field of Design and Production Engineering. Grammar: Using grammar appropriate to the given language level. Learning of structures essential for written and verbal communication in academic and professional environments. Writing: Practising skills in writing various texts essential in academic and work environments, including: reports, CVs, emails, summaries, notes, abstracts, instructions and descriptors of processes. Reading: Deepening reading comprehension of original academic and professional texts. Listening: Developing listening comprehension skills concerning workplace, academic and everyday life situations, such as: telephone conversations, interviews, customer service, tectures and presentations. Speaking: Practising communication skills in academic and work environments, such as: the giving of presentations, job interviews, formal and informal conversations, negotiating, presenting arguments, solving problems, participating in case studies, conducting formal meetings, etc. Practising the correct pronuncation and enformation of original as a language group at a particular level, the student must first attain the preceding level, i.e. At before joining at a language group at a particular level, the student must first attain the preceding level, i.e. At before joining a AZ group, AZ before joining B1, B1 before joining B2, B2 before joining C1 and C1 before joining C2 and C1 before joining C3 and C1 before joining C4 and C1 before joining C4 and C1 before joining		Was a basilean					
language as well as the language of work. Exercises concerning lockcal structures, describing the physical properties of materials, shapes, basic mathematical terminology, interpreting figures and diagrams, and explaining processes.
