

Subject card

Subject name and code	FUNDAMENTALS OF AIR TRANSPORT SYSTEMS, PG_00044605								
Field of study	Transport								
Date of commencement of studies	October 2025		Academic year of realisation of subject			2025/2026			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department Of Transportation Engineering -> Faculty Of Civil And Environmental Engineering -> Wydziały Politechniki Gdańskiej								
Name and surname	Subject supervisor		dr hab. inż. Marek Pszczoła						
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	30.0	0.0	0.0	15.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		5.0		25.0		75	
Subject objectives	Obtaining knowledge in the field of air transport systems, design of airport components, air traffic organization, air traffic engineering and air traffic management.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
Subject contents	Aviation infrastructure. Airports. Landing site. Airways. Objects. Linkaviation infrastructure with urban infrastructure. Air traffic engineering. Motion control and controlair. Flight safety. Air traffic control and management. Directions of transport developmentair. Airport pavement loads. Materials for pavement construction.								
Prerequisites and co-requisites									
Assessment methods and criteria	Subject passing criteria		Passing threshold			Percentage of the final grade			
	Written test passing the lecture					60.0%			
	Project		100.0%			40.0%

Example issues/ example questions/ tasks being completed	PSTP issues - 2020/2021 summer semester:Explain the concepts of airport codes:a) Airport code according to ICAO,b) IATA airport code. Draw a diagram and approximate location of all elements present at the airport (runways, taxiways, aprons, terminal, etc.). Explain the concepts: runway, runway strip, runway threshold, ICAO airport reference code, internal horizontal surface (for determining obstacles at the airport), landing approach surface. Describe what type of aircraft (with which dimensions) can perform regular flight operations at airports with different ICAO reference codes (without specifying a specific model). What is the take-off reference length? Provide and describe what design factors affect the direction of the runway. What functions should taxiways perform? Name and briefly describe the concepts of organizing an airport board. What is it, what is it for and what is the structure and functions of the ILS. 10. Horizontal and vertical marking of runways, taxiways and aprons. 11. Air traffic control systems - traffic control tower. 12. For what purpose and how is the characteristic number marked as a horizontal marking on the threshold of DS being determined? 13. What does VASI mean and what does PAPI mean? 14. What are the basic functions of an airport pavement?What measures are used at airports to combat black ice in winter?What are the basic assumptions of the ICE ALERT system at airports?What do the abbreviations ACN and PCN mean? If the following information is in the runway description for the pilot: PCN 62 / F / B / W / T, what does it mean?						
Work placement	Not applicable						
placement
