

Subject card

Subject name and code	Legal foundations of space activities, PG_00065932								
Field of study	Space and Satellite Technologies								
Date of commencement of studies	February 2026		Academic year of realisation of subject			2025/2026			
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Humanistic-social subject group			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	1		Language of instruction			Polish			
Semester of study	1		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Geoinformatics -> Faculty of Electronics Telecommunications and Informatics -> Wydziały Politechniki Gdańskiej							· Wydziały	
Name and surname	Subject supervisor	dr hab. inż. Zbigniew Łubniewski							
of lecturer (lecturers)	Teachers	dr hab. inż. Z	bigniew Łubnie	ewski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	30.0	15.0	0.0	0.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity Participation in classes including plan				Self-study SUM		SUM		
	Number of study hours	45		8.0		22.0		75	
Subject objectives	The aim of the course is learning by students the knowledge on genesis of international space law, basic fundations defining the legal state of the outer space and celestial bodies, and the legal rules defining the limitations of particular states activities in the space.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	[K7_W05] Has the knowledge necessary to understand system conditions as well as social, economic and other non-technical conditions of engineering activities in space and satellite technology. Has also knowledge of legal foundations of space activities.		Student obtains the knowledge on law basics for activities in space and as the result he understands better the non-technical conditionings of the use of space technologies.			[SW1] Assessment of factual knowledge			
	[K7_K04] Can show resourcefulness and ingenuity in dealing with professional tasks.		Student, by obtaining the knowledge on law basics for business in space, is able to undertake space-related activities.			[SK2] Assessment of progress of work [SK5] Assessment of ability to solve problems that arise in practice			
	[K7_U09] Is able to use his/her knowledge of legal regulations concerning activities in the space industry in the course of carrying out an engineering task.		Student obtains the knowledge, including practical skills, on space law and is able to use it during the accomplishment of technical tasks.			[SU3] Assessment of ability to use knowledge gained from the subject [SU2] Assessment of ability to analyse information			
	[K7_K71] is able to explain the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environment		Student is able to explain the need of knowledge of the international space law basics when conducting an activity in space sector.			[SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice
