

Subject card

Subject name and code	Regulations of the International Maritime Organization, PG_00065557						
Field of study	Naval Architecture and Offshore Structures						
Date of commencement of studies	February 2026		Academic year of realisation of subject		2026/2027		
Education level	second-cycle studies		Subject group		Specialty subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		1.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Institute of Naval Architecture -> Faculty of Mechanical Engineering and Ship Technology -> Wydział Politechniki Gdańskiej						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Hinz				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	9.0	0.0	0.0	0.0	0.0	9
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	9		6.0		10.0	25
Subject objectives	Presentation of selected International Maritime Organisation regulations that are relevant to the ship design process						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W11] interprets social, economic, legal (including industrial and intellectual property laws), and other non-technical aspects of engineering activities, and includes them into engineering practice		Familiarises itself with how to interpret IMO regulations		[SW1] Assessment of factual knowledge		
	[K7_K12] is ready for fulfilling social commitment and initiation of actions for public interest including entrepreneurial thinking and acting		Understands the impact of MO regulation on maritime economic and social life		[SK1] Assessment of group work skills		
	[K7_U14] integrates information obtained from literature and other properly selected sources, including those in a foreign language, creatively interpreting and critically evaluating them, and drawing conclusions		Can synthesise information from the IMO regulations		[SU2] Assessment of ability to analyse information		
	[K7_W13] explains the main principles of individual and teamwork organization, including various forms of entrepreneurship utilizing knowledge from the field of engineering and technical sciences and disciplines relevant to the course of study		Utilises acquired knowledge to correctly apply IMO regulations in the design process		[SW1] Assessment of factual knowledge		

Subject contents	General principles of IMO activity Relation of IMO regulations to national law The main IMO conventions and codes Principles for the interpretation of IMO regulations		
Prerequisites and co-requisites	Presents a well-established knowledge of the fundamentals of ocean engineering with particular emphasis on ship design		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	50.0%	100.0%
Recommended reading	Basic literature	International Convention for the Safety of Life at Sea (SOLAS) International Convention for the Prevention of Pollution from Ships, 1973 as modified by the Protocol of 1978, or "MARPOL 73/78" International Convention on Load Lines International Convention on Tonnage Measurement of Ships	
	Supplementary literature	www.imo.org MSC Circ.1228	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Discuss the scope of the SOLAS Convention Discuss the environmental hazards addressed by the MARPOL Convention What is the basis for selecting life-saving equipment on a ship		
Work placement	Not applicable
